

FEATURE PRODUCT

Add Emergency Mass Notification Messages and Alert Tones to your Existing Paging System

The **DNA-510** is a digital mass notification announcer, capable of providing up to 2 minutes of digitally recorded voice emergency instructions and alert tones over your existing paging system. The **DNA-510** connects to a phone line, analog phone system station or a phone system's unused trunk/line input allowing you to securely page, trigger emergency messages and/or alert tones and program the unit from any remote touch tone phone. When activated, the **DNA-510** will interrupt any current paging or background music and inject an emergency voice message and/or alert tone over your paging system. A live page can also be announced.

Model DNA-510
DOD# 492

The **DNA-510** can be programmed to repeat one up to 2 minute message, two up to 1 minute messages, three up to 40 second messages, four up to 30 second messages or five up to 24 second messages. It can also be programmed with 10 different alert tones for emergency mass notification of: evacuation, lock down, severe weather, fire, bomb threat, hazardous material release, tornado, flash flood, terrorist alert, all-clear, etc.

WHAT'S COOL

Online Sound Library

VIKING makes it EASY for customers to listen to and download the different tones and sounds available for each product.

K-6000-DVA Automated Voice Message Delivery System

Keep People Informed with VIKING's Automated Voice Message Delivery System

AI's Applications

Model K-6000-DVA
DOD# 307

K-6000-DVA
Automated Voice
Message Delivery System

Model **K-6000-DVA** can automatically notify up to 1000 people of an event or an event cancellation, school or business closing or delayed opening. The **K-6000-DVA** is designed to connect to a standard analog CO line, PABX station or VoIP ATA or FXS port. To activate the unit, an authorized official calls the **K-6000-DVA**, dials a 6 digit access code, selects a pre-recorded message or records a live message up to 1 minute, then activates the unit via a touch tone command to automatically call all the phone numbers in a pre-programmed group.

"Hudson Schools will be closed today due to incimate weather. After school activites are cancelled..."

TRIVIA QUESTION

What was the first CD produced for commercial release in the US?

Everyone who faxes, e-mails or calls in the correct answer by **Feb. 14** will be entered into a drawing for a **Bass Lake Cheese Factory** gift!

Neatly boxed assortment of 5 popular specialty cheeses including Medium Cheddar, Hot Pepper Jack, Cajun Colby, Onion & Garlic Jack and Country Blend.

Congratulations to Tina Holm of Anixter, Plymouth, MN – Winner of December's Trivia Question!

December Trivia: The Draft Board gave Elvis a Two Month Deferment to complete what Movie?

Answer: King Creole

DID YOU KNOW?

Got a Square Peg/Round Hole Application?

Consider **VIKING's** Customizing Service!

VIKING knows that you occasionally run into applications where you wish you could “tweak” one of our products. That’s why we offer a custom modification service to alter our products to your unique application. We charge a hourly rate of \$85 for custom software and circuit design changes. And if your “tweak” is already in our library, we just charge a small fee to burn a new chip or modify an in-stock unit.

What kinds of custom “mods” do we do?

Sometimes a DTMF signal from a **VIKING** product duplicates a command from another product on your system. In those cases we modify the software code to provide a non-conflicting DTMF tone. Those types of software changes are relatively easy to perform and the total charges are affordable. We can also add or combine features from several **VIKING** products to build a completely new product. Obviously, circuit changes and custom board designs cost more. But if you have many installations that require the same solution, a custom design from **VIKING** can usually save you a lot of money. So next time you get an RFP that requires multiple pieces of equipment to make a system work, contact us. We can probably build a unit that works better and costs less!

UngUILTY Pleasures?

Doodling – Not so sketchy after all!

Even the most diligent of workers can succumb to scribbling during dull meetings or long phone calls with Ma. But, compulsive doodlers, take heart. A new study finds that when asked to recall detailed information, doodlers, remember more than nondoodlers. Research suggests that creating those funny designs requires just enough of your brain’s effort to stop you from daydreaming, an activity that’s much more taxing on your mind and therefore a bigger distraction. So next time your boss calls a staff meeting, pick up your pen to stay alert.

Cute **VIKING** Kids!
