

APPLICATION Note

TELECOM SOLUTIONS FOR THE 21ST CENTURY

HF-3W

Using an SW-2
"Push-to-Talk" Button

April 24, 2000

Using the HF-3W with a "Push-to-Talk" Button

Note: This document should be used in combination with the HF-3W Handsfree Talkback Amplifier Technical Practice (Fax Back Document 470).

The HF-3W handsfree paging unit allows employees to respond to a paging message without reaching for the telephone. It is perfect for use in city desks, shipping and service applications where quick answers are needed.

For loud background noise, an optional "Push-to-Talk" button may be added using an N/C switch at the speaker or an N/O switch at the phone. The Viking SW-2 panel mount switch (right) will also work.
