

K-1200 "CO" and "No CO" Mixed Operation

The model K-1200 can call tenants using a phone line or it can be used with the model C-3000 for a "No CO" (phone line) application. By adding the C-1000B and C-3000 controllers as shown, the K-1200 can call each tenant using either method. This adds the flexibility of calling some tenants that have phone or cellular service and other tenants that do not have phone service.
