

**VIKING PRODUCT MANUAL****Speaker Phone with  
Push to Talk Button**

SECURITY &amp; COMMUNICATION SOLUTIONS

February 5, 2018

## *Provide Reliable and Intelligent Communication In Noisier Locations*

The **E-30-PT** is designed to provide quick and reliable communication in noisier areas. The mic sensitivity is set to a low level until the **TALK** button is pressed then it is raised to a normal level. In this way, the **E-30-PT** assures that the called party's voice will be broadcast over the speaker. *In applications where the background noise can be louder than the person calling, a handset type phone is recommended.*

The **E-30-PT** features non-volatile memory, a built in dialer, and intelligent call progress detection for automatic hang-up when the call is completed. The **E-30-PT** can be programmed to dial up to 5 different numbers on ring no answer or busy and can be configured to dial these numbers until answered.

The **E-30-PT-EWP** shares all of the features of the **E-30-PT** in addition to Enhanced Weather Protection (EWP) for outdoor installations where the unit is exposed to precipitation or condensation. EWP products feature foam rubber gaskets and boots, silicon sealed

**E-30-PT/E-30-PT-EWP**

**Brushed 316 Stainless steel  
shown with optional VE-5x5**

connections, gel-filled butt connectors, as well as urethane or thermal plastic potted circuit boards with internally sealed, field-adjustable trim pots and DIP switches for easy on-site programming.

### Features

- **Vandal Resistant Features:** 14 gauge louvered 316 stainless steel faceplate with permanent laser etched graphics, speaker/mic screen, heavy duty metal "Call" button and T-10 Torx security mounting screws
- **Weather Resistant Features:** Marine grade 316 stainless steel faceplate, T-screws and push button switch. Switch internally sealed per IP67. Mylar speaker. Self-draining mic mount. Faceplate, mic and speaker gaskets. Weather resistant powder paint on optional **VE-5x5 (DOD 424)**.
- **E-30-PT-EWP** is designed to meet IP66 Ingress Protection Rating (see **DOD 859** for more information)
- Push to talk button
- Telephone line powered
- Non-volatile E<sup>2</sup> memory (no batteries required)
- Programmable to dial up to 5 numbers on busy or ring no answer
- Blue off-hook LED indicator
- Volume adjustments for microphone and speaker
- Advanced call progress detection: disconnects on busy signal, return to dial tone, CPC, reorder tone, maximum call time out and programmable silence time out
- Selectable auto-answer feature for monitoring
- Selectable push button disconnect
- Extended temperature range (-30°F to 150°F)
- Flush mountable using included plastic rough-in box
- Optional **VE-5x5** surface mount back box (**DOD 424**)

### Applications

#### **Non-ADA Hot-Line Phones for:**

- Terminals
- Stadiums
- ATM machines
- Parking lots/ramps
- Convention centers

#### **Gate and Door Entry Phones for:**

- Business lobbies
- Vehicular and Pedestrian gates
- Residences

**CAUTION - When installing on an analog extension of a phone system:** Some phone systems do not conform to analog telecom standards and might not be compatible with the E-30-PT speaker phones. For a detailed description of the telephone line specifications required for any of the E-30-PT phones, see **DOD# 869**.

### Specifications

**Power:** Telephone line powered. Minimum 24V DC talk battery voltage, with a minimum loop current of 20mA loop. Loop current may be boosted on low current lines with a Viking Model **TBB-1B** talk battery booster (see **DOD 632**).

**Minimum Ring Voltage:** 90VAC RMS

**Dimensions:** Overall-5" x 5" x 2.25" (127mm x 127mm x 57mm), Plastic Electrical Box-4" x 4" x 2.12" (102mm x 102mm x 54mm)

**Shipping Weight:** 2.2 lbs (1 Kg)

**Operating Temperature:** -30°F to 150°F (-34°C to 65°C)

**Humidity - E-30-PT:** 5% to 95% non-condensing

**Humidity - E-30-PT-EWP:** Up to 100% condensing

**Connections - E-30-PT:** RJ11 jack

**Connections - E-30-PT-EWP:** Gel-filled butt connectors

# Features Overview

**Mounting Screws:** (4) 6-32 x 3/4" Marine grade 316 stainless steel, flat head, 5/64" hexdrive, screws (included).

**Faceplate:** 14 gauge Marine grade 316 stainless steel faceplate and push button switch (sealed per IP67).

**CALL Button:** Push to initiate call, push again to disconnect. Solid 316 stainless steel internally sealed per IP67.

**Condensation Drain Hole**

**Microphone:** Omni-directional microphone with protective water-resistant cloth.

**Speaker:** Mylar speaker with rubber gasket to maintain water-tight seal and eliminate water deterioration.

**Speaker Screen:** Stainless steel speaker screen with 0.018" diameter holes to prevent punctures from paperclips, etc.

**PUSH TO TALK BUTTON:** Raises microphone volume to normal level when pressed.

**LED:** Lights Blue for "In-Use" indication.

**DIP Switches (see page 7):**

- 1: Normal Audio Detection
- 2: Increased Audio Detection

**Microphone Volume**

**Speaker Volume**

**DIP Switches (see page 7):**

- 1: Push Button Feature (connect / disconnect)
- 2: Auto Answer Feature (on/off)
- 3: Programming Switch (normal/programming)

**Faceplate Gasket:** 1/8" thick closed cell PVC to provide a water-tight seal.

**Earth Ground:** To increase surge protection, loosen the screw labeled (E) (as shown) and fasten a wire with ring terminal (included) from the mounting screw to Earth Ground (grounding rod, water pipe, etc.)

# Installation

## A. Mounting

**IMPORTANT:** Electronic devices are susceptible to lightning and power station electrical surges from both the AC outlet and the telephone line. It is recommended that a surge protector be installed to protect against such surges.

**Caution:** When warm air comes in contact with cold surfaces, such as outside walls, it causes condensation. To help prevent condensation from accumulating inside the E-30-PT, bring conduit into the bottom of the unit. If this is not possible, drill a 1/4" diameter hole in the bottom of the plastic rough-in box.

**\*Note:** Peel off paper liner and adhere gasket to the back of the faceplate, centering it over the four corner mounting holes. Be careful to position the modular jack inside the chassis as not to damage the components on the circuit board.

**Important:** The E-30-PT will NOT mount to a standard double gang box.

**Note:** The plastic rough-in box (part # 259576) may be purchased separately in advance. Go to [www.vikingelectronics.com](http://www.vikingelectronics.com) and click on "Spare Parts".

## B. Wiring the E-30-PT Phone Board

\* **Note:** When installing a line powered phone on a low voltage and/or low loop current phone system extension, a **TBB-1B** Talk Battery Booster may be required, see **DOD# 632**.

\*\* **Note:** The gel-filled (water-tight) butt connectors are designed for insulation displacement on 19-26 gauge wire with a maximum insulation of 0.082 inches. Cut off stripped wire ends prior to terminating.

\*\*\* **Note:** To increase surge protection, loosen the PCB mounting screw labeled  $\oplus$  (as shown above) and fasten a wire with spade terminal (included) from the mounting screw to Earth Ground (grounding rod, water pipe, etc.)

## Programming

### A. Accessing the Programming Mode

The **E-30-PT** phone can be programmed from any Touch Tone phone using a C.O. line, analog PABX/KSU station, or a **DLE-200B** Line Simulator. For more information on the **DLE-200B**, see **DOD 605**.

#### 1. With the Security Code

<b>Step 1.</b>	Move DIP switch 2 to the <b>ON</b> position (sets unit to answer incoming calls - see section H).
<b>Step 2.</b>	From a Touch Tone phone call the line attached to the <b>E-30-PT</b> .
<b>Step 3.</b>	When the <b>E-30-PT</b> answers, enter the 6-digit security code (factory set to 845464 - see section C). A double beep should be heard indicating you have entered the programming mode.

#### 2. Without the Security Code

<b>Step 1</b>	Move DIP switch 2 to the <b>ON</b> position (sets unit to answer incoming calls- see section H).
<b>Step 2</b>	Move DIP switch 3 to the <b>OFF</b> position (incoming calls enter programming without security code, see section H).
<b>Step 3</b>	From a touch tone phone call the line attached to the <b>E-30-PT</b> .
<b>Step 4</b>	When the <b>E-30-PT</b> answers, a double beep should be heard indicating you have entered the programming mode.
<b>Step 5</b>	When finished programming, move DIP switch 3 back to the <b>ON</b> position.

**Warning:** Failure to do **Step 5**. above will cause the **E-30-PT** phone to call Viking Technical Support instead of your programmed phone numbers.

**Note:** If a valid memory position is entered, a double beep will be heard, four beeps indicate an error.

### B. Quick Programming Features

Enter Digits	+ Location
First speed dial number .....	0-20 digits + #00
.....	0-20 digits + #01
Third speed dial number.....	0-20 digits + #02
Forth speed dial number.....	0-20 digits + #03
Fifth speed dial number .....	0-20 digits + #04
To add a * at any point in the dialing string .....	*#
To add a # at any point in the dialing string .....	*#
To add a 4 second pause at any point in the dialing string .....	*7
Toggle between Touch Tone and Pulse Dialing .....	*6
Miscellaneous options (factory set to 000210) .....	6 digits (0-9) + #17
Timing/Dialing options (factory set to 234111) .....	6 digits (0-9) + #18
Change Security Code (factory set to 845464) .....	6 digits (0-9) + #19
Hang up from programming .....	##7
Reset all programming to factory default settings .....	###

### C. Security Code (memory location #19)

The security code allows the user/installer to program the **E-30-PT** phone while DIP switch **3** is in the **ON** (normal) position. The factory set security code is 845464 (V-I-K-I-N-G). It is recommended that the factory set security code be changed. **Example:** To store 123456 as the security code:

Step 1.	Access programming as shown in Programming section A.
Step 2.	Enter 123456 #19...
Step 3.	Hang-up.

**Enter Your Security Code Here:**

								#19
--	--	--	--	--	--	--	--	-----

**Note:** The security code must be 6 digits and cannot include a \* or a #.

### D. Speed Dial Numbers (Memory Locations #00 - #04)

**Note:** Up to 20 digits can be stored in each dial position. Special features such as pause, mode change, Touch Tone \* and # count as single digits.

The speed dial number programmed in location **#00** is the telephone or extension number that is dialed when the "CALL" button is first pressed. Additional speed dial numbers will be dialed when there is no answer or a busy signal is detected and the next number redial features are activated. The **E-30-PT** will cycle through the programmed speed dial numbers until answered. To program, enter the desired speed dial number followed by the memory location number (**#00 - #04**).

To clear a speed dial location, simply enter the memory location (**#00 - #04**) alone. The **E-30-PT** is factory set with no speed dial number programmed.

To Program:	Enter:
*	**
#	*#
4 second pause	*7
Switch to Pulse Mode	*6
0, 1, 2...9	0, 1, 2...9

### E. Timing/Dialing Options (Memory Location #18)

There are six positions in the timing/dialing options. To program these options, enter the six desired timing/dialing digits followed by **#18**. The six available timing/dialing options are defined as shown below.

Dial: A + B + C + D + E + F + # + 1 + 8

Factory Default Setting: 2 + 3 + 4 + 1 + 2 + 1

Talk/Listen Delay \_\_\_\_\_

Call Length \_\_\_\_\_

Silence Time Out \_\_\_\_\_

Dial Next Number on Ring No Answer \_\_\_\_\_

Dial Next Number on Busy \_\_\_\_\_

Pulse Dial Speed \_\_\_\_\_

**Enter Timing/Dialing Settings Here:**

							#18
--	--	--	--	--	--	--	-----

#### Setting A - Talk/Listen Delay

This feature selects switching time between talk and listen modes (VOX switching time). Use chart on the right. **\* Note:** The factory default is .2 seconds.

Touch Tone	Talk/Listen Delay
1	.1 sec
2	.2 sec*
3	.3 sec
4	.4 sec
5	.5 sec
6	.6 sec
7	.7 sec
8	.8 sec
9	.9 sec

### Setting B - Call Length Time Out

This feature selects the maximum length of time that calls can be connected. Programmable in increments of 1 minute up to a maximum of 9 minutes (Touch Tones 1 - 9). Program 0 in this location to disable the call length time out. With the call length disabled, the **E-30-PT** phone must rely on CPC, busy, silence or return dialtone to hang-up. Use chart at the right. **\*Note:** *The factory default is 3 minutes.*

Touch Tone	Call Length Time Out
0	Disabled
1	1 min
2	2 min
3	3 min*
4	4 min
5	5 min
6	6 min
7	7 min
8	8 min
9	9 min

### Setting C - Silence Time Out

This feature selects the length of time that calls will remain connected without voice activity. Programmable in increments of 10 seconds up to a maximum of 90 seconds (Touch Tones 1 - 9). To disable the silence time out, program 0 in this location. Use chart at the right.

**\* Note:** *The factory default is 40 seconds.*

Touch Tone	Silence Time Out
0	Disabled
1	10 sec
2	20 sec
3	30 sec
4	40 sec*
5	50 sec
6	60 sec
7	70 sec
8	80 sec
9	90 sec

### Setting D - Dial Next Number on Ring No Answer

If enabled and a ring-no-answer is detected, the **E-30-PT** phone will dial the next programmed speed dial number, and continue to cycle through the emergency numbers until a call is completed. **\* Note:** *This feature is disabled in the factory default.*

Touch Tone	Setting D
1 or 0	Disabled*
2, 3, 4...9	Dials second number after 2, 3, 4...9 rings respectively

### Setting E - Dial Next Number on Busy

If enabled and a busy is detected, the **E-30-PT** phone will dial the next programmed speed dial number, and continue to cycle through the emergency numbers until a call is completed. **\***

**Notes:** *This feature is enabled in the factory default setting. If the busy signal is interrupted with a promotional message, contact your central office to have it removed.*

Touch Tone	Setting E
1	Disabled
2	Enabled*

### Setting F - Pulse Dialing Rate (Pulses per Second)

The **E-30-PT** phone is capable of different pulse dialing speeds. **\* Note:** *The factory default setting is 10pps (pulses per second).*

Touch Tone	Setting F
1	10 pps*
2	20 pps

## F. Miscellaneous Options (memory location #17)

Dial: A + B + C + D + E + F + # + 1 + 7	Enter Settings Here:														
Factory Default Setting: 0 + 0 + 0 + 2 + 1 + 0	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center; border-bottom: 1px solid black;">A</td> <td style="text-align: center; border-bottom: 1px solid black;">B</td> <td style="text-align: center; border-bottom: 1px solid black;">C</td> <td style="text-align: center; border-bottom: 1px solid black;">D</td> <td style="text-align: center; border-bottom: 1px solid black;">E</td> <td style="text-align: center; border-bottom: 1px solid black;">F</td> <td style="border: none;"></td> </tr> <tr> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="border: 1px solid black; width: 20px; height: 20px;"></td> <td style="border: 1px solid black; width: 20px; height: 20px;"></td> <td style="border: 1px solid black; width: 20px; height: 20px;"></td> <td style="text-align: center; font-weight: bold;">#17</td> </tr> </table>	A	B	C	D	E	F		0	0	0				#17
A	B	C	D	E	F										
0	0	0				#17									
Not Applicable (enter 0) _____															
Hang-up on Return to Dial Tone _____															
Panasonic Mode _____															
Lap Counter _____															

### Settings A / B / C - Not Applicable

### Setting D - Hang Up on Return to Dial Tone

If enabled and a return dial tone is detected, the **E-30-PT** will hang up.

\* **Note:** *The factory default setting is enabled.*

Touch Tone	Setting D
1	Disabled
2	Enabled*

### Setting E - Panasonic Mode

The **E-30-PT** can be programmed to recognize the double ring cadence that is typical of Panasonic phone systems. If the **E-30-PT** is connected to a Panasonic extension, (or any other system that provides a double ring cadence) enable "Panasonic Mode" will allow for proper call progress detection.

\* **Note:** *This feature is disabled in the factory default setting.*

Touch Tone	Setting E
1	Disabled*
2	Enabled

### Setting F - Lap Counter

With the lap counter disabled (factory setting), if the **E-30-PT** is programmed to dial the next number on ring-no-answer and/or busy signal (see page 5 and 6), the **E-30-PT** will continuously call its programmed phone numbers forever until the call is answered.

The lap counter is a programmable counter that determines how many times the **E-30-PT** will cycle through its list of up to 5 emergency number (or up to 3 "Info" phone numbers), before it stops the dialing process and hangs up. When all of the programmed phone numbers have been dialed, the lap counter is incremented and the dialing process repeats. When the lap counter has been met, the dialing process stops and the **E-30-PT** hangs up. \*

\* **Note:** *This feature is disabled in the factory default setting.*

Touch Tone	Setting F
1	Disabled*
2	Lap count = 1-9 times

## G. Assisted Programming

When attempting to program the **E-30-PT** phone, if the phone number of the line it is connected to is not known, the phone can be set to automatically call Viking technical support for assistance. With DIP switch 3 set to OFF (programming mode), pushing the CALL button will cause the **E-30-PT** phone to call Viking, whether it be connected directly to a CO line, or behind a "dial 9" PBX.

The **E-30-PT** phone will first dial 9, and then listen for second dial tone; if detected it will continue to dial Viking's assisted programming phone number. If a second dial tone is not detected, it then knows is not behind a PBX, so it will momentarily hang up and then directly dial Viking's assisted programming phone number. Since this is a long distance phone call, the line must be capable of placing long distance calls for the call to go through. When finished programming, it is very important to set DIP switch 3 back to ON (normal operating mode), and place a test emergency call to be sure all programming was done properly.

**Warning:** *Failure to set DIP switch 3 back to ON when finished programming will cause the E-30-PT phone to only call Viking Technical Support, instead of your programmed emergency number.*

## H. DIP Switch Programming/Speaker and Microphone Adjustments

Two POTs are provided to increase or decrease speaker volume and microphone sensitivity. In certain noisy locations the microphone sensitivity may need to be decreased as shown below. **Caution:** Setting the microphone gain too high may cause distorted audio, prevent the distant party from breaking over and inhibit second number redialing.

DIP Switch	Position	Description
1	ON	"CALL" button alternately connects and disconnects calls (factory default)
1	OFF	"CALL" button connects calls only
2	ON	Incoming calls answered (factory setting)
2	OFF	Incoming calls are not answered
3	ON	Normal operation mode (factory setting)
3	OFF	Learn mode - Any incoming calls are automatically entered into the programming mode (no security code required). Use this option if you have forgotten your security code. Any outbound call will dial Viking Technical Support (see section I). <b>Warning: When finished programming, set this switch back to the ON position, otherwise the 1600A Series phone will only call Viking Technical Support instead of your programmed emergency number.</b>

Switch A	Switch B	Description
ON	ON	Normal audio detection
OFF	OFF	Increase audio detect sensitivity for low level lines. Useful in applications in which voice or busy signals have trouble breaking over the speaker.

## I. Programming Examples

To Program the E-30-PT Phone...	Step 1 - See Section A	Step 2 - Enter Digits:
...to store 123456 as the security code	Enter Programming	1 2 3 4 5 6 # 1 9
...to store a Touch Tone 9, a four second pause and then a pulse dialed 333-4444 in the first speed dial position	Enter Programming	9 *7 *6 3 3 3 4 4 4 4 # 0 0
...to store 555-1234 in the second speed dial position	Enter Programming	5 5 5 1 2 3 4 # 0 1

## Operation

When the "CALL" button is pressed, the **E-30-PT** phone goes off-hook, and dials a pre-programmed telephone number. The front panel LED will light any time the phone is off hook, and flash to show dialing. In the event that the line is busy or there is a ring-no answer, the unit can be programmed to call additional phone numbers. The phone then cycles through up to 5 pre-programmed speed dial numbers until the call is answered. Once answered, the called party will be able to hear the outside person, but at a very low level. When the outside person presses the "Push to Talk" button, his voice will then be heard at a normal level. The **E-30-PT** will hang up on CPC, silence, busy signal, return to dial tone, time out or Touch Tone command (\*#). If programmed to auto-answer, the **E-30-PT** will also answer any incoming call.

## Warranty

**IF YOU HAVE A PROBLEM WITH A VIKING PRODUCT, CONTACT: VIKING TECHNICAL SUPPORT AT 715-386-8666**

Our Technical Support Department is available for assistance Monday 8am - 4pm and Tuesday through Friday 8am - 5pm central time. So that we can give you better service, before you call please:

1. Know the model number, the serial number and what software version you have (see serial label).
2. Have your Technical Practice in front of you.
3. It is best if you are on site.

### RETURNING PRODUCT FOR REPAIR

The following procedure is for equipment that needs repair:

1. Customer must contact Viking's Technical Support Department at 715-386-8666 to obtain a Return Authorization (RA) number. The customer **MUST** have a complete description of the problem, with all pertinent information regarding the defect, such as options set, conditions, symptoms, methods to duplicate problem, frequency of failure, etc.
2. Packing: Return equipment in original box or in proper packing so that damage will not occur while in transit. Static sensitive equipment such as a circuit board should be in an anti-static bag, sandwiched between foam and individually boxed. All equipment should be wrapped to avoid packing material lodging in or sticking to the equipment. Include ALL parts of the equipment. C.O.D. or freight collect shipments cannot be accepted. Ship cartons prepaid to: **Viking Electronics, 1531 Industrial Street, Hudson, WI 54016**
3. Return shipping address: Be sure to include your return shipping address inside the box. We cannot ship to a PO Box.
4. RA number on carton: In large printing, write the R.A. number on the outside of each carton being returned.

### RETURNING PRODUCT FOR EXCHANGE

The following procedure is for equipment that has failed out-of-box (within 10 days of purchase):

1. Customer must contact Viking's Technical Support at 715-386-8666 to determine possible causes for the problem. The customer **MUST** be able to step through recommended tests for diagnosis.
2. If the Technical Support Product Specialist determines that the equipment is defective based on the customer's input and troubleshooting, a Return Authorization (R.A.) number will be issued. **This number is valid for fourteen (14) calendar days from the date of issue.**
3. After obtaining the R.A. number, return the approved equipment to your distributor, referencing the R.A. number. Your distributor will then replace the Viking product using the same R.A. number.
4. The distributor will **NOT** exchange this product without first obtaining the R.A. number from you. If you haven't followed the steps listed in 1, 2 and 3, be aware that you will have to pay a restocking charge.

## TWO YEAR LIMITED WARRANTY

Viking warrants its products to be free from defects in the workmanship or materials, under normal use and service, for a period of two years from the date of purchase from any authorized Viking distributor. If at any time during the warranty period, the product is deemed defective or malfunctions, return the product to Viking Electronics, Inc., 1531 Industrial Street, Hudson, WI., 54016. Customer must contact Viking's Technical Support Department at 715-386-8666 to obtain a Return Authorization (R.A.) number.

This warranty does not cover any damage to the product due to lightning, over voltage, under voltage, accident, misuse, abuse, negligence or any damage caused by use of the product by the purchaser or others. This warranty does not cover non-EWP products that have been exposed to wet or corrosive environments. This warranty does not cover stainless steel surfaces that have not been properly maintained.

**NO OTHER WARRANTIES, VIKING MAKES NO WARRANTIES RELATING TO ITS PRODUCTS OTHER THAN AS DESCRIBED ABOVE AND DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.**

**EXCLUSION OF CONSEQUENTIAL DAMAGES, VIKING SHALL NOT, UNDER ANY CIRCUMSTANCES, BE LIABLE TO PURCHASER, OR ANY OTHER PARTY, FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL OR EXEMPLARY DAMAGES ARISING OUT OF OR RELATED TO THE SALE OR USE OF THE PRODUCT SOLD HEREUNDER.**

**EXCLUSIVE REMEDY AND LIMITATION OF LIABILITY, WHETHER IN AN ACTION BASED ON CONTRACT, TORT (INCLUDING NEGLIGENCE OR STRICT LIABILITY) OR ANY OTHER LEGAL THEORY, ANY LIABILITY OF VIKING SHALL BE LIMITED TO REPAIR OR REPLACEMENT OF THE PRODUCT, OR AT VIKING'S OPTION, REFUND OF THE PURCHASE PRICE AS THE EXCLUSIVE REMEDY AND ANY LIABILITY OF VIKING SHALL BE SO LIMITED.**

**IT IS EXPRESSLY UNDERSTOOD AND AGREED THAT EACH AND EVERY PROVISION OF THIS AGREEMENT WHICH PROVIDES FOR DISCLAIMER OF WARRANTIES, EXCLUSION OF CONSEQUENTIAL DAMAGES, AND EXCLUSIVE REMEDY AND LIMITATION OF LIABILITY, ARE SEVERABLE FROM ANY OTHER PROVISION AND EACH PROVISION IS A SEPARABLE AND INDEPENDENT ELEMENT OF RISK ALLOCATION AND IS INTENDED TO BE ENFORCED AS SUCH.**

### FCC REQUIREMENTS

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the side of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ#TXXXX. If requested, this number must be provided to the telephone company.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive REN's on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of the REN's should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total REN's, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ#TXXXX. The digits represented by # are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

The plug used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this E-10A/E-20B does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

If the E-30-PT/E-30-PT-EWP causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC, if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications to maintain uninterrupted service. If trouble is experienced with the E-30-PT/E-30-PT-EWP, for repair or warranty information, please contact:

**Viking Electronics, Inc., 1531 Industrial Street, Hudson, WI 54016 (715) 386-8666**

If the equipment is causing harm to the telephone network, the telephone company may require that you disconnect the equipment until the problem is resolved.

Connection to Party Line Service is subject to State Tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

**WHEN PROGRAMMING EMERGENCY NUMBERS AND (OR) MAKING TEST CALLS TO EMERGENCY NUMBERS:**

Remain on the line and briefly explain to the dispatcher the reason for the call. Perform such activities in the off-peak hours, such as early morning or late evenings.

It is recommended that the customer install an AC surge arrester in the AC outlet to which this device is connected. This is to avoid damaging the equipment caused by local lightning strikes and other electrical surges.

### PART 15 LIMITATIONS

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

## Product Support: 715-386-8666

Due to the dynamic nature of the product design, the information contained in this document is subject to change without notice.
