Reliable Products for Your Security and Communication Needs

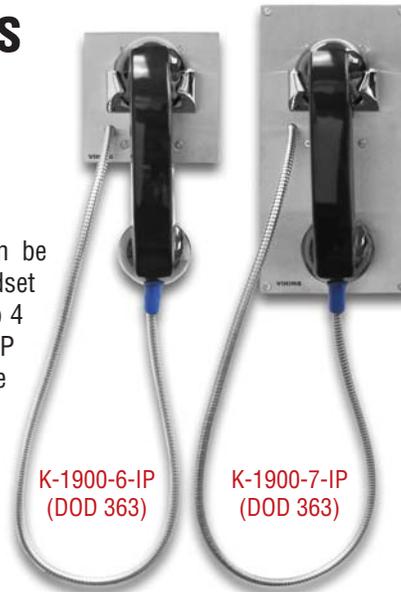

VOLUME 29 : ISSUE 11 NOVEMBER 2017

SPOTLIGHT: Panel Phones

Vandal Resistant VoIP Panel Phones with Auto Dialer and Relay Control

The K-1900-6-IP and K-1900-7-IP VoIP Panel Phones can be programmed to auto-dial a phone number each time the handset is lifted. If the call is not answered, the phone will dial up to 4 additional phone numbers. The K-1900-6-IP and K-1900-7-IP phones are designed to provide quick and reliable communication for SIP VoIP phone systems with PoE. The unit can be programmed from any PC on the same LAN or remotely using a Static IP Address.

- Built-in adjustable ringer
- SIP compliant and PoE powered (class 1<4 Watts)
- Built-in 2 Amp relay contacts
- Auto-dials up to 5 programmed phone numbers, cycles through numbers on busy or no answer
- Mounts on a standard double-gang electrical box
- Optional VE-5x10 Surface Mount Box available

K-1900-6-IP
(DOD 363)

K-1900-7-IP
(DOD 363)

- Models available with optional Enhanced Weather Protection (EWP)
- Wide temperature range: -40°F to 140°F

K-1900-8-IP
(DOD 361)

Vandal Resistant VoIP Phone with Auto Dialer, Keypad and Entry System

The K-1900-8-IP VoIP panel phone can either auto-dial a phone number each time the handset is lifted, be used as a multi-number auto-dialer, or be used as a standard manual dial phone. The phone is designed to provide quick and reliable communication for SIP VoIP phone systems with PoE. The K-1900-8-IP can be programmed from any PC on the same LAN or remotely using a Static IP Address. The K-1900-8-IP phone can dial up to 250 programmable numbers and another 250 rollover numbers.

- SIP compliant and PoE powered (class 2 <6.5 Watts)
- Speed dials up to 250 numbers, each with rollover
- Store up to 1000 keyless entry codes
- Event logging with time and date stamp
- 26 bit Wiegand input for proximity card readers
- Zinc plated steel rough-in box included
- Optional VE-5x10 Surface Mount Box available
- 2 sets of relay contacts
- Built-in adjustable ringer
- Hearing aid compatible amplified handset
- Dimensions: 5.0"W x 10.0"H
- Models available with optional Enhanced Weather Protection (EWP)
- Wide temperature range: -40°F to 140°F

Get to Know Us!

Name: Gail Matz

How long have you worked at Viking?
29 years

What are your responsibilities?

I get all the orders boxed up and ready to be shipped. I enter and print out all shipping labels and make sure we have enough packaging supplies.

Why do you like working at Viking?

It's a hometown business, so it feels more like we are all a big family working here. And it's close for me to drive to work - that's important during the cold, snowy winters up here.

Favorite treat to share at work:

Homemade cinnamon rolls with cream cheese frosting! Yum!

What do you like to do outside work?

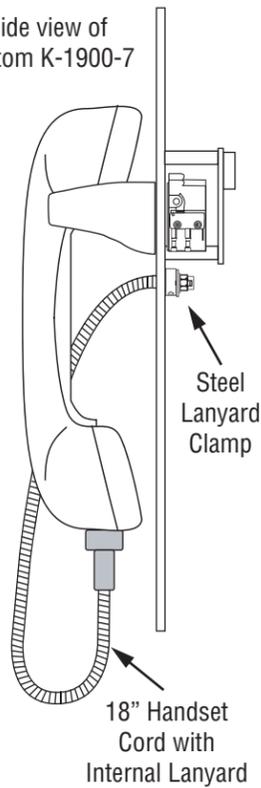

I enjoy bowling, Viking even has a couple of bowling teams. I go to bootcamp, take long walks, and go on cruises with friends. I also like to crochet and do embroidery.

Favorite quote:

"All you can do is the best you can do."
- Paula Abdul

TECH TIPS

Side view of custom K-1900-7

If you're installing a Viking panel phone in an area with a history of vandalism, you should consider ordering a custom panel phone with our 18" heavy duty armored handset cable and an internal stainless steel lanyard. The built in lanyard tethers the handset to a steel clamp on the panel phone, making it a much stronger armored cable. The panel phone looks the same as a standard model, except for a shorter handset cable length. This special handset cable can be ordered on most Viking panel phones.

For more information on custom panel phones, call: 715-386-8861

This month in Technology History

November 20, 1963: The term "hacker" is born

The MIT student newspaper reports that many telephone services have been curtailed "because of so-called hackers," the earliest known use of the term.

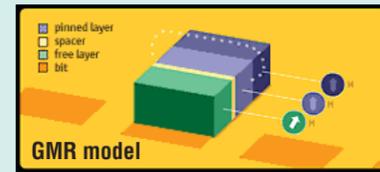

November 22, 1995: Toy Story

Toy Story opened in U.S. theaters, the first feature-film to be made entirely with computer-generated imagery (CGI).

November 11, 1997: GMR heads

IBM announces the first high-capacity desktop PC disk drive with a new breakthrough technology called Giant Magnetoresistive (GMR) heads, which enabled the further miniaturization of disk drives.

Quick Fact:

The 2007 Nobel Prize in Physics was awarded to Albert Fert and Peter Grünberg for the discovery of the GMR effect in 1988.

Viking Product Profiles: Panel Phone Accessories

Vandal and Weather Resistant Surface Mount Boxes

The VE-5x10 Surface Mount Box adds vandal and weather resistance, as well as versatility to Viking's flush mount panel phones.

The VE-5x10 is available in fine texture black powder painted steel or marine grade 316 stainless steel. It is designed to be surface mounted to a single or double gang box, a wall, or a Viking gooseneck pedestal.

Model VE-5x10

Model VE-5x10-SS

Model VE-5x10-NR

Model VE-5x10-NR-SS

NEW Product: Model VE-5x10-NR is the same great box as the original, but without the rainguard. Ideal for surface mounting indoors! Available in both black powder painted steel or marine grade 316 stainless steel.

For more information on Surface Mount Boxes, see DOD 424 or call: 715-386-8861

Weather Protection for Viking Panel Phones

The VE-9x20 heavy duty enclosures provide the ultimate in weather protection for your Viking panel phone! The enclosures are constructed of cast aluminum and are made for years of outdoor service. The heavy aluminum doors are labeled "Telephone" and have a gasket seal to keep out even the harshest weather. The VE-9x20 is available in three high visibility colors: safety yellow, emergency red, or black.

Model VE-9x20Y

Model VE-9x20R

Model VE-9x20B

For more information on the VE-9x20, see DOD 413 or call: 715-386-8861

Pedestal Mount Your Viking Panel Phone

The VE-GNP gooseneck pedestals are designed to be used with any of the VE-Series Surface Mount Boxes above and are ideal for drive up communications. The VE-GNP model is a standard 42" gooseneck pedestal, and the VE-GNP-2 can mount two Viking products at different heights. Mounting a Viking panel phone in a surface mount box to the top gooseneck makes it easy for tall vehicles (like semi trucks) to communicate. Mounting a standard Viking call box to the lower gooseneck is great for communication from a car.

Model VE-GNP-2

Model VE-GNP

For more information on Gooseneck Pedestals, see DOD 424 or call: 715-386-8861

TRIVIA QUESTION

What part of the turkey is saved and "snapped" as a superstitious good luck charm?

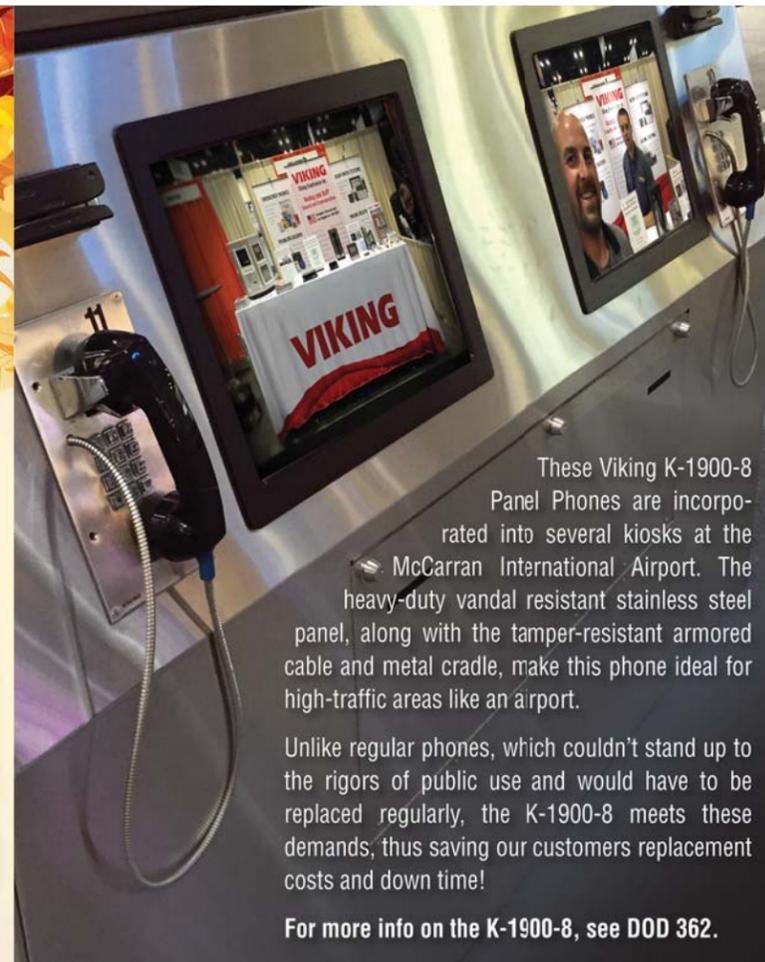

Everyone who calls, emails, or faxes in the correct answer by NOVEMBER 30, 2017 will be entered into a drawing for a delicious Wisconsin cheese assortment - shipped fresh directly from our local Bass Lake Cheese Factory!

OCTOBER TRIVIA: Who wrote the short story "The Legend of Sleepy Hollow"?

ANSWER: Washington Irving

CONGRATULATIONS to **STEVE BLAZER** from Graybar!

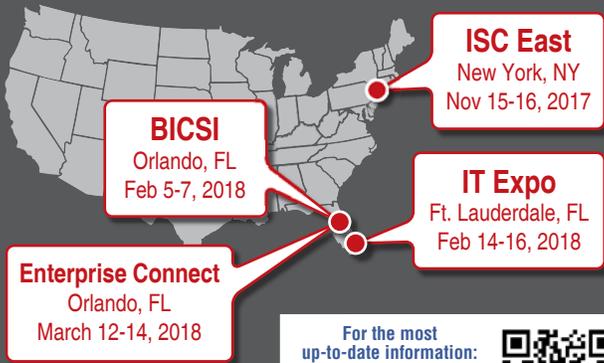

These Viking K-1900-8 Panel Phones are incorporated into several kiosks at the McCarran International Airport. The heavy-duty vandal resistant stainless steel panel, along with the tamper-resistant armored cable and metal cradle, make this phone ideal for high-traffic areas like an airport.

Unlike regular phones, which couldn't stand up to the rigors of public use and would have to be replaced regularly, the K-1900-8 meets these demands, thus saving our customers replacement costs and down time!

For more info on the K-1900-8, see DOD 362.
