NEW in 2017

Interface Your Paging System with Any Telecom or IP Phone System

Viking's FXI-1A Universal Paging Interface allows you to provide paging from virtually any type of phone system instead of from a microphone. Also allows background music and electronic night bell over the audio system.

The FXI-1A provides 30V talk battery for interfacing with an FXO, plain old telephone, or unused analog line input/trunk port. With the flip of a switch, the unit can connect to an FXS or PABX station ring trip port. No power supply is required in this mode. In the event that it must be connected to a "dry" 600 Ohm paging port, the built-in voice activation (VOX) is in control. This configuration is useful when interfacing with systems that do not provide a paging contact closure, such as Panasonic, South Western Bell, Intertel, etc.

For more info on the FXI-1A request DOD 483

Provide Reliable Handsfree Communication!

The E-32 Handsfree Phone is designed to provide quick and reliable handsfree communication and can be connected directly to a CO line or analog PABX/KSU station.

The E-32 features non-volatile memory, a built-in dialer, and intelligent call progress detection for automatic hang-up when a call is completed. The E-32 can be programmed to dial up to 5 different numbers on ring-no-answer or busy, and can be configured to dial these numbers until answered.

Model E-32-EWP also has Enhanced Weather Protection (EWP) for outdoor installations.

For more info on the E-32 and E-32-EWP request DOD 212

Get to Know Us!

Name: Lorraine Siegert

How long have you worked at Viking?

I have been at Viking for 17 years

What are your responsibilities?

My responsibilities include setting up, running and maintaining our high speed placement machines. I also hand place components and inspect the populated circuit boards before and after they are soldered.

Why do you like working at Viking?

I like the fact that we have fun at work and the job is never boring.

Favorite treat to share at work:

My favorite treat is Homemade Rhubarb Cake!

What do you like to do outside work?

I like to read, solve word puzzles, swim, and watch baseball.

Favorite Movie:

"Bull Durham"

Favorite quote:

"There's no crying in baseball!"

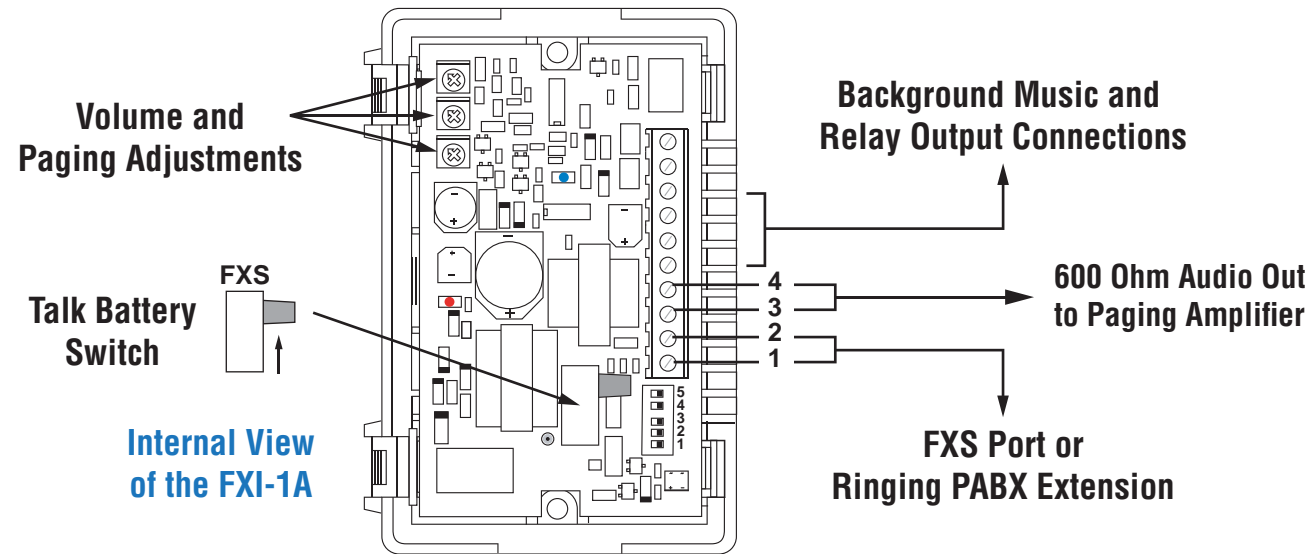

- Jimmy (Tom Hanks)
in "A League of Their Own" (1992)

TECH TIPS

Installing the FXI-1A for FXS (Ring Trip) Paging

The FXI-1A will answer a ringing line, activate its relay, and pass the paging audio on to the amplifier. It will then drop the call based on Page Time Out, Silence Time Out, detecting a Busy Signal, or Calling Party Control (CPC).

See the FXI-1A Product Manual for complete installation instructions: DOD 483.

TRIVIA QUESTION

Which popular Christmas song was composed by James Pierpont in 1857?

[CLICK HERE TO ANSWER!](#)

Everyone who calls, emails, or faxes in the correct answer by DECEMBER 31, 2017 will be entered into a drawing for a delicious cheese assortment shipped from the Bass Lake Cheese Factory!

NOVEMBER'S TRIVIA QUESTION: What part of the turkey is saved and "snapped" as a superstitious good luck charm? **ANSWER:** the Wishbone

WINNER: ANDREA SNITZER from Jenne Inc.

Model
40TB-IP

IP Speaker for SIP Endpoint Paging or Multicast Paging / Background Music, and Making Standard or Emergency SIP Calls

The Viking model 40TB-IP Talk-Back Speaker enables two-way conversations via SIP and also allows for standard paging and background music via multicast. The Talk-Back Speaker easily connects with a single CAT5/6 cable from your PoE switch. Its shallow depth allows the speaker to be conveniently mounted in a standard 2" x 4" stud wall or ceiling.

An auxiliary switch input allows a hard wired wall button to initiate a SIP call. Alternately, an optional wireless remote call button can be used (Viking model BTR-3, right). A momentary button press will initiate a standard call, and holding the button for 3 or more seconds will initiate an emergency call.

For more information on the 40TB-IP or BTR-3 see DOD 502 or call: 715-386-8861

NEW in 2017

Optional Wireless Remote

The Viking BTR-3 Wireless Remote can be purchased separately for activating standard and emergency calls, as well as adjusting audio volume.

Model BTR-3

IP Ceiling Speaker for SIP Endpoint Paging or Multicast Paging / Background Music

Model
40-IP

The Viking model 40-IP Ceiling / Wall Speaker enables SIP endpoint paging and also allows for standard paging and background music via multicast. The speaker easily connects with a single CAT5/6 cable from your PoE switch. Its shallow depth allows the speaker to be conveniently mounted in a standard 2" x 4" stud wall or ceiling.

For more information on the 40-IP, see DOD 503 or call: 715-386-8861

PoE Powered VoIP Endpoint Interfaces Analog Paging Systems with SIP and Multicast Paging Sources

The Viking model PA-IP SIP / Multicast Paging Adapter provides an interface between VoIP phone systems (hardware or hosted/cloud based) and analog paging systems, eliminating the need for an ATA or FXS port. The PA-IP can be used for standard SIP endpoint paging or multicast paging and background music.

The unit easily connects with a single CAT5/6 cable from your PoE switch. An auxiliary trigger input allows an optional hard wired switch or phone system trigger output to enable loud ringing / night bell from after hour incoming calls. Line-level audio output connections are provided for connecting to an external amplifier.

For more information on the PA-IP, see DOD 505 or call: 715-386-8861
