Reliable Products for Your Security and Communication Needs

VOLUME 29 : ISSUE 9 SEPTEMBER 2017

SPOTLIGHT: ADA Compliant Emergency Phones

Model E-1600A (analog)
or E-1600-IP (VoIP)

The E-1600A and E-1600-IP are compact Emergency Phones designed to provide quick and reliable communication. These bright red handsfree phones meet ADA requirements for elevator/emergency telephones.

When the "Push for Help" button is pressed, the phone calls the pre-programmed telephone number. The phones can cycle through up to 5 programmable emergency numbers on busy or no-answer. These emergency phones can be programmed from any touch tone phone. Alternatively, the VoIP emergency phone can be programmed from a PC on the same LAN.

The E-1600A and E-1600-IP ADA Compliant Emergency Phones are highly visible and durable - ideal for busy locations, like a sports stadium.

- Analog models are phone line powered
- VoIP models are PoE class 1 powered
- Models available with Enhanced Weather Protection (EWP) for outdoor installations

For more information on the E-1600A (analog) see DOD 215

For information on the E-1600-IP (VoIP) see DOD 255.

Get to Know Us!

Name: Shelly Busby

How long have you worked at Viking?

I can't believe it's been 30 years!

What are your responsibilities?

I am the Production Supervisor. I make sure the Production department runs smoothly and that we work together.

Why do you like working at Viking?

I like working at Viking because we all work together as a team to manufacture Viking products. Every person at Viking is part of our quality control.

Favorite treat to share at work:

Anything sweet and gluten free.

What do you like to do outside work?

During the Summer my family spends weekends at our camper in southern Minnesota.

Favorite quote:

"Don't put off until tomorrow what you can do today."

- Benjamin Franklin

Ask Viking First!

Since Viking was started in 1969, we've been asking our customers to "Call Us First". Whether you are calling about a Viking product, or even another company's equipment, it's important for us to know what issues you face on a daily basis. In fact, that's where we get our best ideas for product improvements... from you! So, the next time you're wondering if we make a product for a particular application, pick up the phone and call us. If we don't make it, we'll do our best to direct you to someone that does!

TECH TIPS!

Below: Phones in the dugout connect directly with the bullpen and pressbox. Minneapolis, MN

Shown: Model VE-9x12B-1 Outdoor Enclosure, phone sold separately (DOD 413)

It takes numerous people to coordinate a professional sports team - especially during a game. Usually there are coaches on the field, in the dugout, in the bullpen, as well as many other personnel working behind the scenes.

Communication is vital to keeping everything organized and running smoothly - a break in these connections could cost the team a win.

Viking's DLE-200B Phone Line Simulator allows for easy and reliable phone-to-phone communication without having to install a complicated maze of phone lines throughout a stadium.

For more information on model DLE-200B, go to: www.VikingElectronics.com and retrieve DOD 605 or SCAN below

Model DLE-200B

Communicate with team personnel.

Viking Product Profiles: Emergency Phones and Accessories

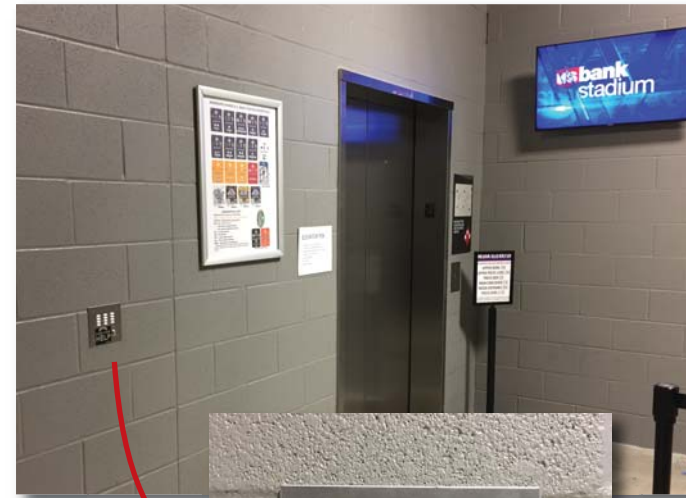

Compact Stainless Steel Emergency Phone

The E-1600-30A is designed to be a rugged and reliable ADA Compliant Emergency Phone. This compact stainless steel phone provides fast handsfree communication for any standard analog telephone line or analog phone system station port. The E-1600-30A phone meets ADA requirements for elevator/emergency telephones, and can be programmed from any touch tone phone.

When the "Push for Help" button is pressed, the E-1600-30A dials a pre-programmed number. In the event that the line is busy or there is no answer, the phone can dial up to 4 more numbers. When the call is answered, the "call connected" LED will light and the phone can be programmed to provide an ID number or a 16 second voice announcement to indicate the location of the emergency phone.

For outdoor installations where the unit is exposed to precipitation or condensation, the E-1600-30A phone is available with Enhanced Weather Protection (EWP). EWP products feature foam rubber gaskets, sealed connections, gel-filled butt connectors, as well as urethane or thermal plastic potted circuit boards with internally sealed, field-adjustable trim pots and DIP switches for easy on-site programming. For more information on EWP, see DOD 859.

For more information on the E-1600-30A, see DOD 215

Also available in VoIP! See DOD 255 for more info

TRIVIA QUESTION

During the seventh inning stretch of a baseball game, it's a tradition to sing what?

Everyone who calls, emails, or faxes in the correct answer by **SEPTEMBER 30, 2017** will be entered into a drawing for a delicious Wisconsin cheese assortment - shipped fresh directly from our local Bass Lake Cheese Factory!

AUGUST TRIVIA:

If someone has Didaskaleinophobia, what are they afraid of?

ANSWER: Going to School

CONGRATULATIONS to LAURA JOHNSON from ANIXTER!

Viking employees did some TEAM BUILDING while watching the Minnesota Twins play the Yankees! (Twins won BTW...)

We even made it on national TV and got circled by Bert Blyleven. Many Viking products were spotted throughout the stadium!

Protection for Your Emergency Phone

The VE-9x12 provides the ultimate in weather protection for your Viking phone or other products. These enclosures are constructed of cast aluminum and are made for years of outdoor service. The heavy-duty aluminum doors are labeled "Telephone" and have a gasket seal to keep out even the harshest weather.

Customize the VE-9x12 by choosing from two panels that allow mounting many different Viking products. Or choose no panel at all for your custom application. These enclosures are available in three high-visibility colors: emergency red with silver lettering, safety yellow with red lettering, or black with silver lettering.

These enclosures are perfect for a busy stadium, parking garage, campus, fueling station, etc.

For more info on the VE-9x12 enclosures, see DOD 413
