

SPOTLIGHT: Enhanced Weather Protection (EWP)

Viking's Enhanced Weather Protection (EWP) gives your product extra defense against mother nature and other hazards

Some emergency and entry phone applications demand extra protection. Phones that are mounted outdoors, exposed to precipitation, condensation, vehicle exhaust, or corrosive atmosphere like salty air near the ocean, all need an extra measure of weather and corrosion resistance.

Our EWP (Enhanced Weather Protection) phones are designed with total reliability in mind. First, we use internally-sealed push button switches, trim pots and DIP switches so you can adjust microphone and speaker volumes and set programming features right at the installation site.

Then we seal the connections at the push button switch, microphone, and LED using a special non-corrosive sealant. We use a special microphone boot that acts as a shield against water penetration. A mylar speaker is used with foam rubber mounting gasket. Closed cell foam gasketing is used behind front panels to prevent water penetration.

Finally we surround the entire board in a flexible urethane or thermoplastic encapsulating material (shown above), leaving the internally sealed field adjustable trim pots and DIP switches accessible. This special material allows the circuit board and its components to expand and contract, while maintaining weather resistance. To protect the wire connections, we include connectors filled with anti-corrosive sealing gel.

GET TO KNOW US

Employee Name: Brad Langer

How long have you worked at Viking?
 25 years

What are your responsibilities?
 As a Manufacturing Engineer I am in charge of every process used to manufacture Viking products. A few examples are: high speed SMT placement, soldering inspection, and mechanical assembly.

Why do you like working at Viking?
 I like the challenge. I like to see what a small American electronics design and manufacturing company can bring to market. I also like the fact that although we are very busy, we still have fun.

Favorite treat to share:
 Christmas cookies

What do you like to do outside of work?
 Travel, hiking, camping, hunting, dog training, writing, performing and recording music.

Favorite movie: Casino (1995)

Favorite quote:
"It's such a fine line between stupid and clever." - David St. Hubbins

TECH TIPS!

Pool Area Emergency Phones

Many schools and communities have swimming pools and although pools are fun for the whole family, they also bring an array of safety concerns. Most states require pool areas to have two-way voice communication systems. This ensures that in the event of an emergency, assistance is only one button push away. Viking Emergency Phones offer cost-effective, easy solutions for your poolside safety concerns. All 1600A and 1600-IP Series phones meet ADA requirements for elevator and emergency telephones. The phones can dial up to 5 emergency numbers (of your choice), as well as 2 central station numbers if Central Station Monitoring is used.

For harsh pool environments, a Viking Emergency Phone with Enhanced Weather Protection (EWP) is recommended.

EWP products are ideal for swimming pool areas where heat and humidity are always an issue!

TRIVIA QUESTION

What actor won his only Academy Award for his role as Rooster Cogburn in the 1969 film *True Grit*?

Everyone who calls, emails, or faxes in the correct answer by April 30, 2019 will be entered into a drawing for a prize.

March Trivia:

The song "Get Back" was #1 on the Billboard Chart for 5 weeks in 1969. What famous band released this song?

Answer: The Beatles

Congratulations to **SHANE HARMON** from **Lower Keys Electric!**

PRODUCT PROFILES

Enhanced Weather Protection is an available option on many different Viking products, but some models are almost always used in outdoor applications or harsh environments. For these exclusive models, we made EWP standard - ensuring the unit is protected from the climate - no matter where it's installed!

ADA Compliant Tower Phones with Blue LED

- Meets ADA requirements for emergency phones
 - High power LED strobe and beacon features:
 - High output / long life LED
 - 4 programmable flash patterns
 - 6 brightness settings
 - Analog and VoIP models available
 - Enhanced Weather Protection (EWP) comes standard, EWP is designed to meet IP66 Ingress Protection Rating
 - Tower Chassis: 8 gauge thick aluminum, 3.0" x 6.0" rectangle tube, powder painted high-visibility yellow
 - Surface mount to rigid wall or post
 - Power supply included for strobe
 - Phone Panel: 14 gauge stainless steel
- For more information on:**
Analog Tower Phones see DOD 217
VoIP Tower Phones see DOD 249

Replacement Panel Phones

- Direct replacement for select GAI-Tronics and Talk-A-Phone panel phones
 - Replacing Code Blue tower phones requires redrilling
 - Analog and VoIP available
 - Enhanced Weather Protection (EWP) comes standard, EWP is designed to meet IP66 Ingress Protection Rating
 - Mounting: Flush mount to Code Blue, GAI-Tronics and Talk-A-Phone towers, wall mounts, boxes and pedestals
 - Material: 12 gauge marine grade 316 stainless steel
- For more info on Replacement Panel Phones request DOD 218 for analog or DOD 255 for VoIP**

The weather has been TOUGH here in Wisconsin - one of the snowiest winters on record! It gave Andrew a chance to demonstrate Viking's **Enhanced Weather Protection**.

Andrew shows how **EWP** helps protect our products from the snow and cold. Check out our video on Viking's YouTube channel.

From sunshine to snowstorms, Viking works!
