Analog Interface

Viking offers many analog telephone interface products. Depending on the product and in some cases the application, these analog interface products can be connected to a:

- CG Line
- PABX / KSU station
- Unused trunk input
- FXO port
- FXO port

VoIP Interface

Viking’s VoIP products feature:
- SIP compliant
- PoE powered
- Automatic Noise Canceling (ANC)
- Network downloadable firmware
- Program remotely

Specific VoIP models also feature 2 Amp relays, programmable “speed dial” numbers, and built-in entry controllers that can accommodate up to 1000 keyless entry codes and/or proximity card numbers.

EWP = Enhanced Weather Protection

Viking’s Enhanced Weather Protection (EWP) products are weather-sealed with a thick protective coating that keeps the elements out. Applications where products are installed outdoors, or in harsh / corrosive environments like a swimming pool area or beach, should always use the EWP version! Features include:

- PCB completely sealed in a petting compound
- Sealed LED, push button switch and microphone connections
- Internally sealed switches, trim pots and dip switches
- Mylar speaker with foam gasket
- Gasketing to prevent water penetration
- Connectors filled with anti-corrosive gel
- EWP products are designed to meet an Ingress Protection rating of IP66

For more information on EWP, see DOD 899.
PRODUCT INDEX by Model Number

**Integrated Color Video Cameras**

Viking offers many door entry phones with built-in color cameras for added security. The compact color composite video output provides versatility.

**Analog Camera Specifications:**
- Power: 8-22V DC 150mA [15V DC UL Listed adapter included with the product]
- Image Sensor: 1/4" color CMOS
- Analog Camera Specifications:
  - Frequency: 225kHz
  - Video Output: 1VPp composite; NTSC, 75 ohms
  - Resolution: 420 lines (640 x 480 1/4" color CMOS)
  - Sensitivity: 0.025 Lux (150lux F1.2 3200K)
  - Lens: 2.9mm, f=1.6
  - FOV (Field of View): 80° Horizental, 60° Vertical, 100° Diagonal
  - Weather Protection: Potted and hermetically sealed, non-corrosive, UL Listed
  - Weight: 2.9 lbs
  - IR Compatibility: Use a Viking model VCAM-1IR, see DOD 190

**Integrated Proximity Readers**

Viking offers several entry phone styles with a built-in proximity reader option for added security. Viking also offers several different external proximity readers. All Viking proximity readers are equipped with Enhanced Weather Protection, which is designed to meet IP66 Ingress Protection Rating.

**Technologies Supported:**
- Viking PRX-C, PRX-C-ISO, PRX-FOB, PRX-1B
- ND::AVID is a trademark of Applied Wireless Identification Group.
- AWID is a trademark of Applied Wireless Identification Group.
- HID and the HID logo are registered trademarks of HID Global Corporation, an ASSA ABLOY company.
- Certain legacy HID® proximity protocols and certain AWID 125kHz proximity products and/or readers are not supported by ND::AVID.

**Frequency:**
- 125kHz

**Transducer:**
- Beeps during card read

**LED:**
- Red, turns off during card read

**26 bit Wiegand Format:**
- 808 Results
- 252 of 260 Results
- 200 Results
ADA Compliant Emergency Phones

- Analog or VoIP interface
- Automatic Noise Canceling (ANC) for proper operation in noisy environments
- Complies with ASME A17.1 Elevator Code when used with LV-1K (page 12)
- Cycles through up to 5 emergency numbers on busy or no answer
- Enhanced Weather Protection (EWP) models available, designed to meet IP66 Ingress Protection Rating

Analog: 1600A Series

Analog Features and Operation

- Telephone line powered
- Can be connected to a CO line, analog PABX station, or FXS port
- Compatible with Central Station Monitoring (CSM)
- 16 second I.D. announcement
- Intelligent call progress detection for automatic hang-up on CPC, silence, busy signal, or time out
- Temperature range: -15°F to 130°F

The 1600A Series Emergency Phones are designed to provide quick and reliable access to emergency personnel via two-way, handsfree voice communication over a telephone network. The 1600A Series have Braille labels and meet ADA requirements for elevator telephones. The phones can be programmed on-site or remotely from a touch tone phone.

When the “Push for Help” button is pressed, the 1600A Series phone goes off-hook, and the built-in touch tone dialer calls the pre-programmed 1 to 20 digit number. The “Call Connected” LED flashes during dialing. In the event that the line is busy or there is no answer, the unit can automatically dial up to 4 more numbers. When the call is answered, the 1600A Series phone lights the “Call Connected” LED steady and sends a field-programmed 1 to 20 digit touch tone number or 16 second voice announcement indicating the location of the emergency phone.

Use the PB-100 (see page 40) to remotely program and poll emergency phones as to their working status.

VolP: 1600-IP Series

VoIP Features and Operation

- 2 Amp relay contacts for lights, strobes, chimes, door or gate control, etc.
- SIP compliant and PoE powered (class 1, <4 Watts)
- 28 second I.D. announcement
- Temperature range: -40°F to 140°F
- Hangs up on busy signal, time-out, or touch tone command

The 1600-IP Series Emergency Phones are designed to provide quick and reliable handsfree communication for SIP VoIP phone systems with PoE. All 1600-IP Series phones meet ADA requirements for elevator / emergency telephones, and can be programmed from any touch tone phone or PC on the same LAN or remotely using a static IP address.

When the “Push for Help” button is pressed, the 1600-IP Series phone dials a pre-programmed telephone number. The “Call Connected” LED momentarily flashes during dialing. In the event the line is busy or there is a ring-no-answer, the unit can be programmed to call additional phone numbers. The phone then cycles through up to 5 pre-programmed emergency numbers until the call is answered. When the call is answered, the digital voice announcer will automatically play to identify the location of the emergency call and then light the “Call Connected” LED to show that handsfree communication to emergency personnel is established. The “#” key will send the I.D. number (if programmed), and play the announcement again. The distant party will know the location of the emergency call by either the voice announcement or by decoding the touch tone I.D. number.

Installation requires the assistance of a network administrator / IT technician.

CHECK THIS OUT! Emergency Phones with HD Video | See page 46 for more info »
Compact Emergency Phones

- Material: 16 gauge steel with durable high visibility textured powder paint
- Includes Braille label, “Call Connected” LED, and I.D. Announcement for ADA compliance
- Dimensions: 5.25” x 4.0” x 2.0”
- Mounting: Surface mount to walls, posts, single gang boxes, or recess mount in elevator phone boxes
- For features and operation, see page 8

42-Inch Tower Phones with Blue LED Strobe

- High intensity flashing LED strobe light with steady-on beacon option, 4 flash patterns and 6 brightness settings
- Strobe: Vandal resistant polycarbonate plastic
- Tower Chassis: 8 gauge thick aluminum, 3.0” x 6.0” rectangular tube, powder painted yellow
- Phone Panel: 14 gauge 316 marine grade stainless steel faceplate with stainless steel button
- Mounting: Surface mount to wall or post
  - Power supply included for strobe
  - Comes standard with Enhanced Weather Protection (EWP), see page 6
  - Meets IP66 Ingress Protection Rating
  - For features and operation, see page 8
Vandal Resistant Phone

- Material: 12 gauge brushed 316 marine grade stainless steel
- Mounting: Flush mount in elevator cabs, stairwells, hallways, etc.
- Dimensions: 13.0” x 10.5” x 2”
- Heavy-duty panel with laser etched lettering for years of use

These are parts kits without a chassis

For features and operation, refer to page 8

Kit includes:
- Circuit board
- Speaker
- LED
- Microphone
- Button(s)
- Braille label

Analog to VoIP Conversion Kit

The E-1600-53-IP conversion kit is designed to convert select Viking analog phones to VoIP. The kit saves money by re-using the housing, faceplate, mic, speaker, switch, and LED. The conversion takes less than 15 minutes (slightly longer for EWP models). For features and operation, refer to page 8.

Analog Line Sharing

- Routes both incoming and outgoing calls
- Priority to emergency devices
- Incoming calls routed to one of two ports by distinctive ring or quick callback
- Provides a busy signal to the phone port when an emergency device is in use
- Can store-and-forward and rerouting dialer functions
- Emergency callback function maintains line availability for 911 callback

Line Verification Panel

- Test 1600A Series phones for dial tone
- Detects a cut or disconnected phone line
- ASME A17.1 Elevator Code compliant
- Use on analog devices on an analog line
- Use with Viking 1600-IP Series phones to indicate LAN connection failures

Smart Line Sharing Device

- Allows an emergency device to share a line with other devices
- Routes both incoming and outgoing calls
- Priority to emergency devices
- Incoming calls routed to one of two ports by Caller ID, Distinctive Ring, or Call Back
- Can store up to 12 Caller ID numbers

Analog (No Dial) Panel Phones

The K-1500-6A and K-1500-7 provide simple vandal resistant communication in a flush mount, stainless steel, panel telephone. The K-1500-6A and K-1500-7 work with Viking’s DLE-200B Line Simulator (page 29) or on a dedicated ringdown circuit. If dialing is necessary, use Viking’s K-1900-7 or combine the K-1500-6A or K-1500-7 with Viking’s K-1900-5 Hot-Line Dialer (page 17).

The K-1500-6A and K-1500-7 consist of a heavy gauge stainless steel panel, an armored cable, a heavy duty black hearing aid compatible amplified handset, and an all metal cradle. Both phones are designed to mount to a standard double gang electrical box.

- K-1500-6A Dimensions: 4.56” W x 4.5” H
- K-1500-7 Dimensions: 5.0” W x 10.0” H

Analog Hot-Line Panel Phone

The K-1900-7 Series panel phones will auto-dial a 1-32 digit programmable phone number each time the handset is lifted. The unit can touch tone or pulse dial and will not auto-dial on incoming calls.

Models K-1900-712L and K-1900-712L-EWP have a 12” long armored cable with an internal stainless steel lanyard for additional strength.

Models with Enhanced Weather Protection (EWP) are designed to meet IP66 Ingress Protection Rating.

- Dimensions: 5.0” W x 10.0” H
- Vandal resistant 0.105” thick 316 marine grade stainless steel panel
- Hearing aid compatible amplified handset with volume control
- Touch tone or pulse auto-dialing
- Armored cable and metal cradle
- Operating temperature: -30˚ to 140˚ F
- Optional VE-5x10 Surface Mount Box (page 33) or a VE-9x20 enclosure (page 34), each sold separately
- If a ringer is required, use an external unit such as the Viking LPR-1 (page 27) or SR-1 (page 23), each sold separately

Analog Panel Phone with Keypad

The K-1900-8 Series panel phones can either auto-dial a phone number each time the handset is lifted, be used as a multi-number auto-dialer, or be used as a standard (manual dial) phone. The unit will touch tone or pulse dial and will not dial on incoming calls.

Models K-1900-812L and K-1900-812L-EWP have a 12” long armored cable with an internal stainless steel lanyard for additional strength.

Models with Enhanced Weather Protection (EWP) are designed to meet IP66 Ingress Protection Rating.

- Dimensions: 5.0” W x 10.0” H
- Vandal resistant 0.105” thick 316 marine grade stainless steel panel
- Tamper-resistant armored cable and metal cradle
- Temperature range: -30˚ to 140˚ F
- Hearing aid compatible amplified handset with volume control
- Optional VE-5x10 Surface Mount Box (page 33) or a VE-9x20 enclosure (page 34), each sold separately
- If a ringer is required, use an external unit such as the Viking LPR-1 (page 27) or SR-1 (page 23), each sold separately

VoIP Panel Phones with Dialer

The K-1900-6-IP Series and K-1900-7-IP Series VoIP Panel Phones will auto-dial a 1-20 digit programmable phone number each time the handset is lifted. If the call is not answered, the phone will dial up to 3 additional phone numbers. The phones are PoE powered and can be programmed from any PC on the same LAN or remotely using a Static IP Address.

When a call initiated by the panel phone is answered by an apartment or business tenant, a built-in relay may be activated to control an electric gate or door strike. The relay can also be programmed to activate whenever the phone is off hook, ideal for controlling cameras, etc.

Models K-1900-712L-IP and K-1900712LIPEWP have a 12” long armored cable with an internal stainless steel lanyard for additional strength.

Models with Enhanced Weather Protection (EWP) are designed to meet IP66 Ingress Protection Rating.

- **K-1900-6-IP Series** Dimensions: 4.56”W x 4.5”H
- **K-1900-7-IP Series** Dimensions: 5.0”W x 10.0”H
- Provide vandal resistant communication for SIP VoIP phone systems

VoIP Panel Phone with Built-In Entry System

The K-1900-8-IP Series VoIP panel phones can either auto-dial a phone number each time the handset is lifted, be used as a multi-number auto-dialer, or be used as a standard manual dial phone. The panel phone is PoE powered and can be programmed from any PC on the same LAN or remotely using a Static IP Address.

The K-1900-8-IP Series phone can dial up to 250 programmable numbers and another 250 rollover numbers. When a call initiated by the panel phone is answered by an apartment or business tenant, a built-in relay may be activated to control an electric gate or door strike. A request for exit (REX) input is included for easy exiting.

Models K-1900-812L-IP and K-1900812LIPEWP have a 12” long armored cable with an internal stainless steel lanyard for additional strength.

Models with Enhanced Weather Protection (EWP) are designed to meet IP66 Ingress Protection Rating.

- Provide vandal resistant communication for SIP VoIP phone systems
- Speed dials up to 250 numbers, each with a rollover number
- Store up to 1000 keyless entry codes
- PoE powered (class 2 < 6.5 Watts)
- Event logging with time and date stamp
- 2 sets of relay contacts for door / gate / camera control
- 26-bit Wiegand input for optional proximity card readers
- Built-in ringer
- Dimensions: 5.0”W x 10.0”H
- PoE powered (class 1<4 Watts)
- Built-in ringer
- Dials up to 3 additional numbers on busy or ring no answer
- Flush mount to a standard double gang box
- Surface mount any of the K-1900-7-IP Series phones with a VE-5x10 Surface Mount Box (page 33) or a VE-9x20 enclosure (page 34), each sold separately
- Hearing aid compatible amplified handset with volume control
- Flush mount to a standard double gang box
- Optional VE-5x10 Surface Mount Box (page 33) or a VE-9x20 enclosure (page 34), each sold separately

Single Number Dialer Hot-Line Phones

Auto Dialing Emergency / Courtesy Phones

The K-1900 Series of Hot-Line phones are programmable to dial a 1-32 digit telephone number each time the phone’s handset is lifted. The products may be programmed to touch tone or pulse dial and will not dial on incoming calls.

- 1-32 digit programmable speed dial number
- Telephone line powered and touch tone programmable
- Hearing aid compatible amplified handsets with volume control
- Touch tone and 10/20 pps pulse dialing
- Non-volatile memory (no batteries required)
- Restricts fraudulent calls from hand held dialers
- Available in red, ash or custom colors (see below)
- Operates on a CO line, analog PABX station, or FXS port
- Optional Q170600 RINGER can be added (see below)

### Model | Description | DOD
--- | --- | ---

Hot-Line Tone / Pulse Dialers

These analog PABX, CO line or FXS port powered dialers automatically dial the programmed number each time the connected phone goes off-hook.

Model K-1900-4 provides 10 or 20 pps pulse dialing and automatically dials a 1-16 digit phone number when an associated telephone is taken off-hook.

Model K-1900-5 provides 1 - 32 digit touch tone dialing and 1 or 4 second pauses. The K-1900-5 can also help eliminate toll fraud by blocking hand-held dialers and "hook-switch" or pulse dialing.

2 Input Dialer / Announcer

The K-202-DVA is a two input, multi-number auto dialer and digital announcer, designed for emergency and non-emergency message notification. The K-202-DVA has two dry contact inputs, each of which can dial up to seven 32-digit phone numbers and play a message up to 1 minute in length specific to that input.

- Two normally open or normally closed contact inputs
- 2 minutes of record time (1 minute per input)
- Record messages locally or remotely
- Stores up to seven 32-digit phone numbers per input
- 7 number dialer rolls to the next number on busy or no answer
- Call progress detection capability with normal and fast busy, call pickup, CPC and ring-no-answer

8 Input Dialer / Announcer

The K-2000-DVA is a programmable, eight input, multi-number auto dialer and digital announcer, designed for both emergency and non-emergency message notification. It can store up to eight 32-digit numbers per input, for a total of up to 64 different numbers. Record up to eight different messages, with a total record time of eight minutes.

- 8 normally open or normally closed contact inputs, can also be set as enabled or disabled
- 8 minutes of record time (1 minute per input)
- Record messages locally or remotely
- Programmable message repeat and lap counter
- Terminals to connect a switch for local reset of all inputs

SIP / Multicast Paging Adapter with Amplifier

The PA-IP is a SIP and/or Multicast Paging Adapter that provides an interface between VoIP phone systems (hardware or hosted / cloud based) and analog paging systems. The adapter eliminates the need for an ATA or FXS port. The PA-IP can be used for standard SIP endpoint paging and/or multicast paging and multicast background music. The unit easily connects with a single CAT 5/6 cable from your PoE switch.

- SIP endpoint and/or multicast group member
- PoE powered (class 3, <13 Watts)
- Paging prioritization
- Supports up to 10 multicast paging groups
- Relay for activating door locks, strobe lights, external amplifiers, etc.
- Built-in high efficiency 6 Watt class D amplifier can drive up to 6 analog 8 Ohm speakers
- Line-level output to connect external amplifier
- Line-level input for background music or mass notification
- Network downloadable firmware
- Access code to prevent unwanted SIP calls
- Autoprovisioning via Viking programming software

**Model** | **DOD**
---|---
PA-IP | 505

---

IP Speaker for SIP Endpoint and/or Multicast Paging

The 40-IP Speaker enables SIP endpoint paging and also allows for standard paging and background music via multicast. The 40-IP easily connects with a single CAT 5/6 cable from your PoE switch. Its shallow depth allows the speaker to be conveniently mounted in a standard 2” x 4” stud wall or ceiling.

- SIP endpoint and/or multicast group member
- Supports up to 10 multicast paging groups
- PoE powered (class 3, <13 Watts)
- Paging prioritization
- Built-in high efficiency 6 Watt class D amplifier can drive up to 5 additional analog 8 Ohm speakers
- Line-level audio input and line-level audio output for connecting to an external amplifier
- Network remote speaker volume control
- Autoprovisioning via Viking programming software
- Dimensions: 11” diameter x 4” total depth

**Model** | **DOD**
---|---
40-IP | 503

---

SIP / Multicast Talk-Back Speakers

Viking’s Talk-Back Speakers enable two-way conversations via SIP and also allow for standard paging and background music via multicast. The Talk-Back Speakers easily connect with a single CAT 5/6 cable from your PoE switch. An auxiliary switch input allows a hard wired wall button to initiate a standard or emergency SIP call.

- PoE powered (class 3, <13 Watts)
- Up to 28 second ID announcement
- Plays audio from multicast
- SIP endpoint or multicast group member
- Up to 10 multicast paging groups
- Automatic Noise Canceling (ANC) for operation in noisy environments
- Viking’s proprietary VOX switching eliminates the need for “Push to Talk”
- Auto-answer feature for monitoring
- Built-in 6 Watt class D amplifier
- Can drive up to 5 external analog speakers for greater coverage
- Relay for activating door locks, strobe lights, external amplifiers, etc.
- 40TB-IP’s shallow depth allows easy mounting in a wall or ceiling
- 22TB-IP is designed for quick and easy installation in drop or suspended ceilings
- Line-level input and output

**Model** | **Description** | **DOD**
---|---|---
22TB-IP | 24” x 24” Drop-In Ceiling Tile | 508
40TB-IP | 11” Diameter Speaker | 502
BTR-3 | Wireless Remote | 502

Model BTR-3 Wireless Remote
Initiates SIP calls and controls volume.
*Compatible with 40TB-IP only.*
2 Watt Paging Amplifier / Loud Ringer

- For PABX and FXO applications
- Drives up to (3) 8 Ohm paging horns or speakers

The PA-2A monitors up to 6 analog lines for ringing or can be activated by a phone system contact closure. A loud electronic warble (108 dB @ 1 meter), double gong, quadruple chime or a door chime can be selected to announce incoming calls. To page, connect to a paging port, unused trunk input, or FXO port on a phone system. The unit provides 2 Watts of power - enough to drive three 8 Ohm speakers. The PA-2A has an input for a loud ringing on/off switch, an output for controlling a 12 Volt relay and a 600 Ohm output for sourcing high powered paging amplifiers.

<table>
<thead>
<tr>
<th>Model</th>
<th>DOD</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA-2A</td>
<td>485</td>
</tr>
</tbody>
</table>

The PA-2A includes one 25AE paging horn and power supply. For additional ceiling speakers and paging horns use models 25AE, 30AE, 35AE, 40AE, and 300AE (see page 22 for specifications).

15 Watt Telecom Paging Amplifier

- For Centrex, PABX, FXO and FXS applications
- Drives up to (15) 8 Ohm paging horns or speakers

The PA-15 allows paging from a PABX paging port, an unused trunk input / FXO port (provides 36 Volts of talk battery), or an analog PABX station, Centrex, CO line or FXS port. The PA-15 can disconnect on CPC, busy, silence or a 16 to 72 second (defeatable) timer. The PA-15 can provide an alert tone prior to paging. Background music (muted during page) can be added from an external source. Four electronic tones are available for loud ringing. Power supply included.

<table>
<thead>
<tr>
<th>Model</th>
<th>DOD</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA-15</td>
<td>486</td>
</tr>
</tbody>
</table>

For ceiling speakers and paging horns use models 25AE, 30AE, 35AE, 40AE, and 300AE (see page 22 for specifications).

30 Watt Telecom Paging Amplifier

- For PABX and FXO applications
- Drives up to (30) 8 Ohm paging horns / speakers or (50) 70V or 25V speakers

The PA-30 provides paging from the phone system paging port or connect to an unused trunk input or FXO port (provides 40 Volts of talk battery). The PA-30 has separate inputs and volume controls for paging, auxiliary source, loud ringing and background music. A contact closure or ringing line can activate loud ringing. Four electronic tones are available for loud ringing. The PA-30 also has inputs for a night transfer (loud ringing) on/off switch. The PA-30 has a 600 Ohm output to drive additional amplifiers. Electronic switching eliminates pops and clicks. Power supply included.

<table>

<td>497</td>
</tr>
</tbody>
</table>

For ceiling speakers and paging horns use models 25AE, 30AE, 35AE, 40AE, 300AE, 25AE-70V, and 30AE-70V (see page 22).

60 Watt Power Amplifier

- Add 60 Watts of total paging power to two zones
- Drives up to (60) 8 Ohm or (100) 70V or 25V speakers

The PA-60 boosts the power output of smaller paging systems by 60 to 100 speakers. Since each input has its own gain adjustment, one zone can be turned up louder for warehouse paging horn speakers, and the other zone can be turned down for office ceiling speakers. Two zones can also be helpful for installations in which one group of speakers is connected to a source that provides background music using the Viking PI-1A (page 21) paging interface unit, and the other zone provides only paging. The PA-60 inputs are transformer coupled so they are floating and isolated. Connect to line level audio or direct to an existing paging amp output. Power supply included.

<table>

For ceiling speakers and paging horns use models 25AE, 30AE, 35AE, 40AE, 300AE, 25AE-70V, and 30AE-70V (see page 22).

250 Watt Power Amplifier » PA-250 & PA-250-IP | See website for info
Self-Amplified Paging System

The SA-25 Self-Amplified Paging control unit interfaces with virtually any telecom or IP phone system with a paging port, an analog FXS, or FXO port. The system can provide background music from an external source and generate loud or night ringing from a ringing analog station or contact closure. The SA-25 control unit is backwards compatible with the older Legacy Valcom® and Bogen® 4-wire self-amplified speakers.

The SA-25 can directly drive a combination of up to 25 self-amplified Viking 2-wire and/or older Legacy 4-wire self-amplified speakers. One SA-1R remote and power supply included.

Remote Controlled Self-Amplified Speaker

Model SA-15 is an 8 inch paging speaker that has a built in 1.5 Watt power amplifier, an infrared remote control detector, and an integrated digital volume control, all built into an attractive off-white grill for flush mounting in office ceilings. The SA-15 self-amplified paging speaker uses a proprietary two wire protocol in which both 40 Volts DC power and audio are combined on the same pair of wires. Connect only to Viking model SA-25 controller or use the SA-X12 expander to connect to any paging system.

Remote Controlled Paging Horn

The Viking model SA-1H is a 5 inch paging horn that includes a 1.5 Watt power amplifier, an infrared remote control detector, and an integrated digital volume control. The SA-1H self-amplified paging horn uses a proprietary two wire protocol in which both 40 Volts DC power and audio are combined on the same pair of wires. It is designed for direct connection to the Viking model SA-25 Controller or SA-X12 Expander.

Anti-Feeback Paging Interface

- Eliminate the feedback "squeal" when paging
- Compatible with paging ports or trunk (FXO) ports
- High quality (80K/40K) digital message storage
- High output: 2V RMS into 600 Ohms
- Programmable paging features
- Power supply included

**Model** | **DOD** | **Price**
--- | --- | ---
FBI-1A | 465 | 

**HOW IT WORKS:** The “live” page is digitally recorded. When complete, the paging amplifier is activated and the page is replayed once or twice.

Night Bell Over Existing Paging System

- Provide electronic warble tone over an existing paging system
- Powered by ring signal – no external power supply required
- Terminals for automatic switching between paging audio and warble tone
- Auxiliary relay contacts provided
- Connects to a CO line, analog station, or FXS port with RJ11 or terminals
- Floating 600 Ohm audio output

**Model** | **DOD** | **Price**
--- | --- | ---
K-600F | 476 | 

**Applications Include:** Offices, Clinics, Warehouses, Factories – anywhere people may be working after the receptionist goes home

Page Port / Trunk Input / FXO Paging Interface

Provides paging using phones (instead of a microphone) over a PA audio system. VOX relay contacts mute background music for phone systems that don’t provide a paging contact [Panasonic®, S.W. Bell®, Intertel®, etc.]. If a Paging Port is not available, use an unused trunk input or FXO port.

- Provides talk battery for connecting to an unused trunk input or FXO port
- Power supply included

**Model** | **DOD** | **Price**
--- | --- | ---
PI-1A | 491 | 

- 600 Ohm output
- VOX switching
- Night Bell
- Mutes music

Audio Isolation Board

- Eliminate ground loop hum in paging systems
- Consolidate two audio sources into one
- Excellent sound quality
- Daisy chain a paging system speaker output into a second power amplifier’s input
- Inputs available on screw terminals, RCA jack, and modular jack
- Outputs available on screw terminals and RCA jack
- Power supply included

**Model** | **DOD** | **Price**
--- | --- | ---
AIB-1 | 259 | 

- 600 Ohm output
- Night Bell
- Mutes music

Handsfree Talk-Back Paging System

- Interface with unused trunk (FXO) ports, single line phones, and phone systems with a two-way paging port
- 3 Watts of paging port
- Page alert tone
- “Push-to-Talk” feature
- 28V DC talk battery
- Background music input
- 25-50 ft talk-back range
- Power supply included

**Model** | **DOD** | **Price**
--- | --- | ---
HF-3W | 470 | 

[1] 25AE Paging Horn included (page 22)
Zone Paging Controller

- Switches line level signal to amplifiers
- Switches amplified signal to speakers
- Expand to 8 zones using 2 units

The ZPI-4 paging system is capable of switching a line level signal (600 Ohms) to amplifiers or an amplified signal to 70V or 8 Ohm speakers. The ZPI-4 features separate level controls for paging and background music (can be disabled on a per-zone basis). Also provided is a night bell with adjustable volume activated by a dry contact closure or a ringing analog PABX/KSU/FXS station.

Paging / Ringing Amplifier

- Amplify key phone paging and ringing
- Add speakers to loaded paging systems
- Adjustable volume control
- Powers up to (3) 8 Ohm speakers
- Screw terminal connections
- Power supply included
- One 25AE Paging Horn included

The ZPI-4 is compatible with ringing analog PABX/KSU/FXS station ports as well as unused trunk/FXO port inputs, and will interface directly with standard paging ports.

Tile Bridge

Use when mounting Viking ceiling speakers on 2' x 2' or 2' x 4' ceiling tiles

Compatible Viking models: 30AE, 35AE, 40AE, 30AE-70V, 40-IP, 40TB-IP, SA-15 (not included)

8 Ohm Paging Speakers and Horns

- 30AE: 6 Watt 8 Ohm ceiling speaker, mounting hardware included
- 35AE: 6 Watt 8 Ohm ceiling speaker with volume control and mounting hardware included
- 40AE: 15 Watt 8 Ohm ceiling speaker with a modern look, excellent sound quality, and integral mounting system. Ideal for offices, reception areas, etc.
- 25AE: 12 Watt 8 Ohm compact paging horn
- 300AE: 30 Watt 8 Ohm / 70 Volt paging horn for additional volume and voice intelligibility

Add Paging and Door Chimes to Your Audio System

Both the SLP-1 and SLP-4 Paging Controllers allow the user to page family members or co-workers from any phone in your home or small business. Pages are heard over the same speakers installed for multi-zone music distribution. Music is muted during the page and optionally during phone calls. The SLP-1 and SLP-4 connect in series with a single existing phone line and features a built-in 2 Watt amplifier, stereo pre-amp output, music on hold input, intercom features, and selectable loud ringing. Power supply included.

The SLP-4 also provides inputs for 4 lighted doorbell switches. The inputs select different sounds from a library of preloaded recordings or users may record their own sounds. When the doorbell switch is pressed, the user pages, the music is muted while the appropriate sound or page is heard over the system speakers.

</table>

The SLP-4 allows you to select from 8 preloaded CD quality sounds or download your own custom WAV files via a USB port.
Master Clock / Networked Clock Controlled Tone Generator

- Accurate time base synchronizes periodically with your network or internet time
- Can also be used as a Master Clock to synchronize Viking CL Series clocks
- Automatic daylight savings time and leap year correction

Features:
- Up to 14 schedules and up to 1000 events
- 6 minutes of CD quality WAV file record time
- Pre-loaded with common school, business and factory alert tones or program with your own messages/tones over your network
- 4 inputs for triggering emergency fire evacuation, severe weather, lock down and all clear alert tones or messages
- RS-485 output for communicating time sync data when used with Viking CL Series wireless analog and digital clocks (below)

The CTG-2A is a networked clock controlled tone / message generator designed to provide accurately timed tones and/or messages over your existing paging system. This provides a cost effective way of signaling school period changes, factory shifts, breaks, lunch periods or providing messages at specific times for store sales, promotions, closing times, airport loading zones, etc. The CTG-2A can also be used as a master clock to automatically synchronize Viking CL Series clocks. The CTG-2A comes with programming software and an Ethernet port to allow PC programming of timed events, schedules, network or internet time synchronization, wave file download, message volume, daylight savings time, leap year, auxiliary relay control, etc. Power supply included.

Wireless Synchronized Clocks and Accessories
All clocks have built-in ¼ Watt repeaters capable of retransmitting the clock sync signal up to 500 ft in open space

Wireless analog clocks are battery operated and require no wiring. Battery life using two D size Duracell Procell batteries is more than 5 years. The clocks are updated every 4 hours from the CTG-2A. Viking offers analog clocks in 12" diameter (CL-A12) and 16" diameter (CL-A16). Shown left with optional double mount bracket CL-DMA12 or CL-DMA16.

Wireless bright digital clocks require 120 Volt AC outlet (power supply included). The clocks are updated every minute from the CTG-2A. Viking offers a digital clock with a 2.5" tall display (CL-D2) and a 4" tall display (CL-D4). Shown with optional double mount bracket CL-DMD2 or CL-DMD4.

RF Transmitter / Repeater
The CL-RFT transmitter receives time sync data from the CTG-2A and transmits to the clocks via 915 to 928 MHz frequency hopping technology. Powerful 1 Watt (30dBm) output communicates up to 6,500 ft. in open space. It can also be configured as a repeater for larger spaces. No FCC license required. Dimensions 11" x 8" x 1.7".

Wire Guards
Viking’s Wireless Clock System provides reliable, accurately synchronized clocks for your entire facility. Eliminating dedicated clock wiring can save you thousands of dollars on installation and also allows for easy retrofitting. The system is comprised of a CTG-2A master clock, a CL-RFT clock RF transmitter, and Analog or Digital wireless clocks. The clocks will always display the correct time via updates from the CTG-2A.

CAUTION: CL Series clocks cannot be used as stand alone clocks. They must be used in conjunction with a CTG-2 or CTG-2A master clock and one or more CL-RFT transmitters.

Power Guards
Protect your 12" or 16" analog clock with a sturdy wire guard, model CL-WGA16.

Digital Clocks
Wireless bright digital clocks require 120 Volt AC outlet (power supply included). The clocks are updated every minute from the CTG-2A. Viking offers a digital clock with a 2.5" tall display (CL-D2) and a 4" tall display (CL-D4). Shown with optional double mount bracket CL-DMD2 or CL-DMD4.

Analog Clocks
Wireless analog clocks are battery operated and require no wiring. Battery life using two D size Duracell Procell batteries is more than 5 years. The clocks are updated every 4 hours from the CTG-2A. Clocks can be located up to 6,500 ft. from the CL-RFT transmitter / repeater or up to 500 ft. from another synchronized clock.

Viking offers analog clocks in 12" diameter (CL-A12) and 16" diameter (CL-A16). Shown left with optional double mount bracket CL-DMA12 or CL-DMA16.

Wire Guards
Protect your digital clocks with model CL-WGD4.

CAUTION: CL Series clocks cannot be used as stand alone clocks. They must be used in conjunction with a CTG-2 or CTG-2A master clock and one or more CL-RFT transmitters.
Phone Line Powered Remote Access Device

- Programmable security code and access code
- Separate 600 Ohm audio and telephone line output
- Programmable call timer and silence time-out
- Relay contacts available for systems that need a dry contact closure

The RAD-1A remote access device gives authorized users remote access to one way paging amplifiers, digital announcers, and other audio programs. A programmable access code prohibits access by unauthorized users.

The RAD-1A answers on the first ring and disconnects on CPC, call time out, silence time out, busy, or by dialing #7. Separate 600 Ohm audio and telephone line outputs are provided, allowing connection to audio amplifiers, digital announcers, or phone systems.

<table>

<tr>
<td>RAD-1A</td>
<td>410</td>
</tr>
</tbody>
</table>

Amplified Remote Access Device

The RAD-AMP extends the usefulness of your phone system to remote employees, as well as providing call forwarding to remote employees or locations.

As a Telecommuting Extender, the RAD-AMP gives remote workers access to most PABX/KSU features from their home or cell phone. The home based employee hears a special tone when answering and has the option of taking the work related call. Remote call center personnel can "Log-In" and "Log-Out" or change their forwarding number as their location changes. Using touch tones, remote workers can use phone system features to transfer the call to another extension or voice mail, start a conference call, generate a page or any other feature available to an analog PABX/KSU extension.

As a Line Extender, the RAD-AMP provides authorized users remote access to PABX, Centrex or Electronic Key system features.

As a Call Diverter, the RAD-AMP provides call forwarding from one location to another. After detecting an inbound call, the RAD-AMP accesses a second phone line, dials a pre-programmed touch tone number, and then bridges the two lines.

<table>

Service Observation Unit

Monitor, train, motivate, even assist your personnel or customer service staff without disrupting the activity at their work station. Each SO-24A Service Observation unit lets you access 24 stations (up to 240 with 10 units) or phone lines by dialing a two to four digit code from any supervisory phone. The station being monitored hears nothing; however, a supervisor can quickly enter the conversation by dialing a "*". A record control output permits selective recording by simply dialing a "9". Alternatively, all monitored conversations may be recorded.

- Built-in "Talk Assist" feature
- Automatic gain control equalizes in and outbound conversation levels
- Call progress tones for observing supervisor
- Power supply included

The MTG-10 can be connected to a paging source, phone system’s paging port or background music. When a contact closure is provided to one of the inputs, the paging or background music is faded out and the appropriate tone is generated over the paging system. The siren and the evacuation whoop have priority and override any other tone.

This auxiliary electronic ringer operates on any analog line that provides a minimum of 40 Volts 20-30 Hz AC ring voltage. Nominal 3 KHz warble provides up to 92 db SPL @ 1 meter. The LPR-1 can be connected via screw terminals or modular RJ-11 jack. A volume control and a 7 foot modular cord are provided. No power supply is required.

The LDB-2 Ring/Loop Detector monitors an analog phone line for ringing and/or in use condition. Two sets of relay contacts are activated when these conditions are detected. When monitoring for ring, the relay can be adjusted to stay on steady or follow a ring cadence. A 12 Volt output is provided. Power supply included.

The PAN-1A allows a Viking speaker phone (E-10A, E-20B, E-30, E-35, E-40, E-50, E-60, E-65, E-70, E-75, etc. pages 43-45) to be connected in place of Panasonic® KX-T30865 or KX-T7775. Power supply included.

The CPC-1 and CPC-4 provide a momentary (1 second) break in the line current to signal telephone equipment the calling party has hung up. They generate the disconnect signal after detecting busy, fast busy, return to dial tone, or silence. Available in 1 line (CPC-1) and 4 line (CPC-4) models. Phone line powered.

Automated Receptionist

The AR-1 is a digital call screening and messaging system designed to answer calls with a greeting, then let callers ring through to talk to someone live, select from pre-recorded messages or hang up. Programming functions and message recording can be done locally or remotely. Record from tape, CD, PC, etc. or via audio input.

The AR-1 has up to 12 minutes of record time and up to 8 different messages can be recorded. The unit also offers distinctive/custom ring patterns.

Phone Line Powered Announcer

The DVA-LPA is an digital voice announcer specifically designed for applications requiring simple ring trip announcements. The DVA-LPA will answer the incoming call, play a pre-recorded message and then disconnect.

Professional Digital Voice Announcer / Recorders

Applications Include: ACD, UCD, Intercept, Hotel / Motel Wake Up, Night Answer, Ski Resorts, Movie Theaters, Work Schedules, School Closings, Out of Service, etc.

Digital Voice Announcer with 7.5 Minutes of Record Time

- 2 Watt amplifier for use in conjunction with paging speakers and horns
- AGC for recording from handset, tape, CD, PC soundcard, etc.
- 4 professional on-hold messages included
- Recording can be on-site or in a professional studio
- Power supply included

The DVA-2WA is a digital announcer/recorder with a built in 2 Watt amplifier. Designed to provide music and promotion on hold, the DVA-2WA can playback in a continuous loop or alternate between promotions and an auxiliary music source at 2 second to 30 minute intervals. Any number of multiple messages may be recorded. The output of the DVA-2WA may also be connected directly to loudspeakers for repeated messages or played at the push of a button for museum displays, information booths, point of interest locations, retail applications, etc.

- Applications
  - On-Hold Promotion Messages and Background Music
  - Message Repeater for: Airports, Museums, Moving Sidewalks, Information Displays, Car Rental, Amusement Parks, etc.

- Customer Favorite Application:
  - Play Brahms Lullaby over a paging system to announce a new birth!
  - For more info, see DOD 865.

Model DVA-LPA 128

Model DVA-2WA 110

Standard Carbon Handset

For voice recording on select Viking products.

Memory Expansion Chip

Expand record memory of the DVA-3003.

Model ERAM-60 1 Minute Expansion Chip 813

Use with model DVA-3003
Two-Way Ringdown Circuit

- Select standard or distinctive ringing
- Precise dial tone
- 32V talk battery
- 20 Hz/2 REN ring output
- 0.15 or 2 second CPC
- Prison phone mode

The DLE-200B Line Simulator produces two-way communication between standard telecom products such as key systems, PABXs, fax machines, modems, and standard single line phones without phone lines. Power supply included.

Advanced Ringdown Circuit

- 911 mode for classroom training
- Provides name and number caller ID
- Touch tone detection or standard Ringdown
- Precise dial tone, ringback, busy, reorder, and S.I.T. tones
- Audio jack for amplified speaker or loading voice mail systems

The DLE-300 simulates loop start phone lines and allows two-way communication between telecom devices or systems. It provides standard or distinctive ringing (6 REN) and 40 Volts talk battery. Power supply included.

4 Port Auto Routing Switch

- Routes calls via CNG tone, distinctive ringing, or touch tones sent by calling device or manually
- Allows any four analog devices to share a single line
- Ports are balanced to prevent noise on long runs
- Caller ID information is stored and retransmitted during transfer
- Provides realistic ring-back tones while re-ringing selected device
- Compatible with high speed modems
- Power supply included

Talk Battery and Ringing Power Supply

- Automatic “privacy” eliminates interruptions on both in and outbound calls
- Monitors for calling party control (CPC)

The PS-48-RGA power supply provides talk battery plus standard ring voltage where and when needed. Housed in a convenient wall mount enclosure, the PS-48-RGA comes complete with a plug-in power supply. The PS-48-RGA will provide telephone communication equipment with 48V DC talk battery. In addition, the PS-48-RGA will produce 90V 20 Hz sine wave ring voltage rated up to 10 REN. This allows a phone system to sequence up to 30 ringing phones.

Power Fail Bypass Unit

Continue to receive your calls, even if the phone system is down. The PF-6A bypass unit connects 6 standard single line station phones directly to the CO lines. When the system is restored, calls in process will not be interrupted.

The PS-48-RGA comes complete with a plug-in power supply. The PS-48-RGA will provide telephone communication equipment with 48V DC talk battery. In addition, the PS-48-RGA will produce 90V 20 Hz sine wave ring voltage rated up to 10 REN. This allows a phone system to sequence up to 30 ringing phones.

Ground to Loop Start Converter

Model GLS-12 is designed to allow up to 12 standard telephone sets, multi-line key systems and other loop start equipment to be connected to 2 wire ground start CO trunk lines. The GLS-12 provides the CO with the signaling required to draw dial tone when the loop start equipment goes off hook. Incoming calls ring directly to the loop start devices.

- 12 circuit automatic ground start to loop start equipment converter
- Stackable to increase capacity
- Easy, straight forward installation via an RJ-21X 25 pair connector
- No power supply required

The Model GLS-12 is designed to allow up to 12 standard telephone sets, multi-line key systems and other loop start equipment to be connected to 2 wire ground start CO trunk lines. The GLS-12 provides the CO with the signaling required to draw dial tone when the loop start equipment goes off hook. Incoming calls ring directly to the loop start devices.
Blue Strobe / Beacon Kit

- High intensity long life LED technology
- 4 programmable flash patterns
- 6 programmable brightness settings
- Monitors analog lines for ringing and/or off hook or activate with a contact closure
- Program strobe to flash steady or follow ring cadence
- Use with Viking emergency phones (pages 8-12) or any analog phone

Blue Strobe Light

- High intensity long life LED technology
- 4 programmable flash patterns
- Requires 12V DC Power
- 6 programmable brightness settings

Applications
- Noisy areas where visual status is required
- Signal personnel of equipment malfunctions
- Warn personnel they are entering a restricted area

911 Strobe Controller

- Activates on 911, 9-911, and 8-911 calls and 505 (test) or programmable number
- Bright flashing 0.75” LED visible over 100ft.
- Trigger a doorstrike to enable quick and easy EMS access to your home
- Resets by contact closure or touch tones
- Provides 12VDC and relay contacts to operate an external strobe or visual indicator
- Power supply included

Phone Status Indicator

Bright 0.75” LED visible over 100 feet, power supply included

Analog Phones: Flashing LED indicates “Ringing”, steady LED indicates “On the Phone” and stutter flash indicates “Message Waiting” stutter dial tone is detected. Will also follow the cadence of 90 to 125V message waiting voltage.

Electronic Phones: Flashing LED eliminates guessing whose phone is ringing. Connect to electronic phone’s speaker.

Headsets: Flashing LED ends interruptions by indicating that you are “On the Phone”. Special T adapter provided.

Applications:
- Nursing Homes
- Office Buildings
- Schools
- Housing Complexes
- Assisted Living

Line Powered Indication

The model LPL-1 connects to any standard analog phone line to indicate “Ring” (visual flashing), “On the Phone” (steady on) or “Message Waiting” (fast flash) indication*. The large flashing LED can be seen up to 100 feet away. When used with a headset on an analog phone, you can end interruptions when associates don’t realize you are on the phone. Phone line powered.

* When installed on phone systems with standard 90VDC message waiting voltage.

Message Waiting Light Retrofit Kit

- Operates on standard 80-150V DC message waiting voltage
- Fully modular for quick plug-in installation
- Blinks on message waiting or ringing
- LED visible for 50 feet
- Compatible with nearly any telephone system
- Use as a ring indicator in office settings

Note: Will not detect stutter dial tone (use model VR-1B above).

Replacement Lens Available in 5 Colors:

Ring Shape Conditioner and Power Booster

Viking’s Ring Boosters are designed to reshape and increase the ringing power of an existing analog line, PABX extension, FXS port, IP phone system analog port or any other telecom device which provides ringing. The units duplicate the incoming ring cadence, allowing compatibility with custom ringing features. Each line is capable of ringing four 1 REN or eight 0.5 REN telephones and does not affect normal operation of the telephone line or features, such as distinctive ring, caller ID, call waiting, hookswitch flash features, CPC signaling, etc. Viking offers four sizes to fit many different applications.

- True Sine wave ring signal output
- Boosts ring to 4 REN per line
- Caller ID compatible
- Will not affect normal line operation
- Reshapes troublesome square wave ringing
- Model RG-224 connects directly to CISCO® VG224

Long Loop Adapters

Viking’s Long Loop Adapters extend analog station loop length to 30,000 feet. The LLA-1 and LLA-4 provide long line and off premise extension (OPX) capabilities for PABX and KSU analog stations, ISDN terminal adapters, channel banks, etc. The units are compatible with pulse dialing, touch tone dialing, hook switch flash features, CPC signaling, and Caller ID features. A ground screw terminal allows for improved surge protection and connection to an earth ground reference for the regenerated line.

- Convert an analog KSU/PABX station to a standard voltage OPX
- Provides 48 VDC talk battery
- Provides 20 Hz, 10 REN sine wave ringing
- Electrically isolates PABX station from extended loop

VE-5x5-PNL Series
Blank Panel Boxes

The VE-5x5-PNL Series is designed to surface mount a custom switch, keypad, or card reader.

- The blank front panel is made from aluminum, making it easy to drill, cut or form. The panel is straight lined and coated with a tough clear powder coating to resist corrosion. Four screws and a gasket are included for easy installation.
- The VE-5x5-PNL Series is compatible with any of Viking’s VE-GNP Series gooseneck pedestals (see page 33 for more info).

Enclosures for Installing Products Outdoors

The 9x12 and 9x20 provide the ultimate in weather protection for your Viking product or other telecom devices.

These enclosures are constructed of cast aluminum and are made for years of outdoor service. The heavy-duty aluminum doors are labeled "TELEPHONE" and have a gasket seal to keep out even the harshest weather. The 9x12 allows you to choose from two panels that allow mounting many different Viking products.

Both the 9x12 and 9x20 are available in three high visibility colors: emergency red with silver lettering, safety yellow with red lettering, or black with silver lettering.

Applications Include:

- Parking Lots
- Playgrounds
- Campuses
- Maintenance Areas
- Swimming Pools
- Roadside Help Areas
- Building Exteriors
- Hospitals
- Fueling Stations
- Swimming Pools
- Hospital

## Enclosure Accessories

**VE-PBL**: Push button lock and key set for any 9x12 or 9x20 enclosure.

**VE-SPG**: Hinge door return spring for use with the 9x12 and 9x20. Please note - the 9x20 includes a VE-SPG.

**9x12MK-1**: Internal adapter panel 1 for the 9x12.

**9x12MK-2**: Internal adapter panel 2 for the 9x12.

**9x20MK**: Internal adapter panel for the 9x20.

The C-1000B allows single line phones or phone systems to share a phone line with one or two Viking W-Series doorboxes. The C-1000B provides two touch tone controlled relays to operate door strikes or gate openers and provides doorbox triggered CCTV camera switching. Viking doorboxes can be used on single line residential or home office applications as well as on fully loaded systems, when used with a C-1000B.

- Allows two Viking W-Series doorboxes to share a single telephone line with a residential or business telephone system
- Custom ringing mode to distinguish doorbox calls from CO calls
- Provides 2 touch tone controlled SPDT relay contacts (5 Amp rating) for door strikes or gate openers
- Calls can be placed on hold when visitors call from the doorbox
- Doorbox triggered CCTV camera switching
- Call waiting tones indicate which doorbox is calling and distinguish a doorbox call from a CO line call
- Built-in talk battery for “No CO Line” applications
- Compatible with Viking’s Single Line Paging Controllers, model SLP-1 or SLP-4 (page 23)
- Keyless entry/postal lock input
- Auxiliary contact output for doorbell, light, etc.

Model | Description | DOD |

C-1000B | Door Entry and Camera Controller | 168 |

**Door Entry and Camera Controller**

Analog Handsfree Doorboxes

Viking's handsfree doorboxes are available in four different chassis configurations and are designed to interface directly with an unused trunk input/FXO port of a phone system. One or two doorboxes can also share an existing phone line when used with a C-1000B doorbox controller. When the “Call” button is pressed, the doorbox generates a standard or custom ring cadence.

- Connect to a phone system’s unused trunk input, FXO port or a Viking C-1000B controller (above)
- Blue LED call progress/night light on W-1000, W-3000 and W-3005
- High output speaker amplifier with volume adjustment
- Adjustable microphone volume
- 24 Volt talk battery
- 20 Hz ring generator (6.0 REN ring load maximum)
- Selectable ring cadence and number of rings
- Selectable “Push-to-Talk” feature for noisy environments
- Operating temperature range: -15°F to 130°F
- Enhanced Weather Protection (EWP) models available, designed to meet IP66 Ingress Protection Rating (Learn more about EWP see DOD 859)
- W-3005 features a built-in analog color video camera with wide viewing angle and tilt/tilt adjustments
- W-3005 can use one CAT 5e cable for audio and video transmission

W-1000

- Faceplate: Vandal resistant 12 gauge louvered aluminum with weather resistant black textured powder paint.
- Mounting: Flush mount or use an optional Viking Surface Mount Box sold separately (page 32).

W-2000A

- Chassis: Impact resistant, UV stable light grey plastic with black UV stable printed graphics.
- Mounting: Surface mount only.

W-3000

- Faceplate: Vandal resistant 14 gauge louvered 316 marine grade stainless steel with #4 brushed finish and laser etched graphics.
- Mounting: Flush mount or use an optional Viking Surface Mount Box sold separately (page 32).

W-3005

- Faceplate: Vandal resistant 14 gauge louvered 316 marine grade stainless steel with #4 brushed finish and laser etched graphics.
- Mounting: Flush mount or use an optional Viking Surface Mount Box sold separately (page 32).
12 Button Entry Phones with Built-In Directories

Features
- Analog or VoIP interface
- 12 buttons speed dial up to 20 digits each, with 12 rollover numbers
- Easy one button push operation
- Integrated relays for door strike and camera control
- Built-in custom tenant directory
- Enhanced Weather Protection (EWP) models available, designed to meet IP66 Ingress Protection Rating
- Flush mount with the included zinc plated steel rough-in box
- Optional Surface Mount Boxes available (page 33, sold separately)
- Heavy-duty 16 gauge louvered 316 marine grade stainless steel faceplate
- Permanent laser etched graphics
- Heavy-duty 14 gauge louvered marine grade stainless steel faceplate
- T-10 Torx security mounting screws

Analog Models
- Interface to a CO line, analog PABX station, or FXS port
- hangs up on CPC, busy, silence, time-out or dial tone
- Operates on 12 to 24 volts AC/DC [12VDC adapter provided]
- 50 keyless entry codes
- Selectable auto-answer feature for monitoring
- Postal lock input
- Touch tone restriction from microphone
- Use with model C-1000B (page 35) for increased security
- Compatible with model C-3000 (page 39) for “No CO” (phone line) operation
- Operating temperature: -30° F to 150° F

VoIP Models
- SIP compliant and PoE powered (class 2, 65 Watts)
- Two sets of SPDT 1 Amp relay contacts for door/gate or camera control
- Blue “Call / Status” LED indicator
- Automatic Noise Canceling (ANC) feature for proper operation in noisy environments
- Network downloadable firmware
- Program up to 1,000 keyless entry codes and/or proximity card numbers
- Keyless entry codes and proximity numbers can be programmed to only allow access at specific times and/or days of the week
- Event logging with time and date stamp
- Hangs up on busy, time-out or touch tone command
- Remotely programmable
- Programmable microphone and speaker volume
- Selectable auto-answer feature for monitoring
- Operating temperature: -40°F to 140°F

Analog Interface
Viking offers many analog telephone line interface products. Depending on the product and in some cases the application, these analog interface products can be connected to:

- CO Line
- PABX / KSU station
- Unused trunk input
- FXS port
- FXO port

VoIP Interface
Viking’s VoIP products feature:
- SIP compliant
- PoE powered
- Automatic Noise Canceling (ANC)
- Network downloadable firmware
- Program remotely

Specific VoIP models also feature 2 Amp relays, programmable “speed dial” numbers, and built-in entry controllers that can accommodate up to 1000 keyless entry codes and/or proximity card numbers.

EWP = Enhanced Weather Protection
Viking’s Enhanced Weather Protection (EWP) products are weather-sealed with a thick protective coating that keeps the elements out. Applications where products are installed outdoors, or in harsh / corrosive environments like a swimming pool area or beach, should always use the EWP version. Features include:

- PCB completely sealed in a potting compound
- Sealed LED, push button switch and microphone connections
- Internally sealed switches, trim pots and dip switches
- Mylar speaker with foam gasket
- Sealing in prevent water penetration
- Connectors filled with anti-corrosive gel
- EWP products are designed to meet an Ingress Protection rating of IP66

For more information on EWP, see DOD 856.
Handsfree Entry Phones with Built-In Keypads

### Analog Models
- Telephone line powered
- Interface to a CO line, analog PABX station, or FXS port
- Advanced call progress detection: disconnects on busy signal, return to dial tone, CPC, reorder tone, call time-out, and 40 second silence time out
- Auto-answer feature for monitoring
- Selectable push button disconnect
- Adjustable mic and speaker volume
- Programmable VOX (microphone/speaker) switching speed
- Operating temperature: -20°F to 130°F

### VoIP Models
- Two sets of 2 Amp relay contacts for door/gate control
- SIP compliant and PoE powered (class 2, <6.5 Watts)
- Automatic Noise Canceling (ANC) feature for proper operation in noisy environments
- Network downloadable firmware
- Speed dial up to 250 numbers
- Cycles to rollover number on busy or no-answer
- Program up to 1,000 keyless entry codes and/or proximity card numbers
- Keyless entry codes and proximity card numbers can be programmed to only allow access at specific times and days of week
- Event logging with time and date stamp
- Remotely programmable
- Programmable microphone and speaker volume
- Operating temperature: -40°F to 140°F

### Features
- Analog or VoIP Interface
- Two finishes: Brushed Stainless Steel or Oil Rubbed Bronze (BN)
- Enhanced Weather Protection (EWP) models available
- Blue “Call/Status” LED indicator
- Flush mount with the included zinc plated steel rough-in box
- Optional Surface Mount Boxes available for all models on this page (see page 32, sold separately)
- 14 gauge covered 316 marine grade stainless steel faceplate
- Permanent laser etched graphics on stainless steel models
- Stainless steel “Call” button
- Heavy duty sealed keypad
- T-10 Torx security mounting screws

### Compatible Viking Controllers
- C-500 (page 42)
- C-2000B (page 42)
- C-3000 (page 39)
- C-4000 (page 39)
- K-1900-3 (page 39)
- SRC-1 (page 41)

### K-1700 Series
- Entry phone with built-in keypad.
- Stainless steel model (left) shown in optional VE-6x7 Surface Mount Box (see page 32, sold separately)

### K-1705 Series
- Built-in analog color composite video camera
- 420 lines of resolution and 80° viewing angle
- Tilt and swivel adjustment

### K-1770 Series
- Built-in proximity reader
- 125KHz compatible 26-bit Wiegand format
- Compatible with Viking proximity credentials (see page 38)

### K-1775 Series
- Built-in analog color video camera
- 420 lines of resolution and 80° viewing angle
- Built-in proximity reader
- 125KHz compatible 26-bit Wiegand format
- Compatible with Viking proximity credentials (see page 38)
**125 KHz Proximity Reader**

- Standard 26-bit Wiegand interface
- Use with Viking PRX-C, PRX-C-ISO, PRX-F0B, LRT-4, certain legacy HID® proximity protocols* and certain AWID 125KHz proximity protocols**
- Comes with Enhanced Weather Protection (EWP), designed to meet IP66 Ingress Protection Rating
- Compact size mounts to mullion / door frame

**Model** | **DOD**
--- | ---
PRX-1 | 221

---

**Mullion Mount Proximity Reader with Keypad**

- Read range of up to 6 inches
- Reader Format: 26-bit Wiegand
- Keypad formats: 26-bit Wiegand and 8-bit burst
- Use with Viking PRX-C, PRX-C-ISO, PRX-F0B, LRT-4, certain legacy HID® proximity protocols* and certain AWID 125KHz proximity protocols**
- Comes standard with Enhanced Weather Protection (EWP)

**Model** | **DOD**
--- | ---
PRX-5 | 224

---

**Keypad with Proximity Reader**

- Reader format: 26-bit Wiegand
- Keypad formats: 26-bit Wiegand and 8-bit burst
- Use with Viking PRX-C, PRX-C-ISO, PRX-F0B, LRT-4, certain legacy HID® proximity protocols* and certain AWID 125KHz proximity protocols**
- Comes with Enhanced Weather Protection (EWP), designed to meet IP66 Ingress Protection Rating

**Model** | **DOD**
--- | ---
PRX-2 | 219

---

**Proximity Cards and Fobs**

- No magnetic strip to wear out
- No batteries
- PRX-C is credit card size with slot
- Thinner, more flexible PRX-C-ISO
- No minimum quantities

**Model** | **DOD**
--- | ---
PRX-C | 198
PRX-C-ISO | 198
PRX-F0B | 198

---

**High Performance Proximity Reader**

- Read range of up to 16 inches
- Standard 26-bit Wiegand interface
- Use with Viking PRX-C, PRX-C-ISO, PRX-F0B, LRT-4, certain legacy HID® proximity protocols* and certain AWID 125KHz proximity protocols**
- Comes with Enhanced Weather Protection (EWP)
- Surface mounts to non-metallic wall, post, or single gang electrical box

**Model** | **DOD**
--- | ---
PRX-3 | 228
PRX-3-MK-GNP | 229
PRX-3-MK-VEGNP | 229

---

**Long Range 4 Channel Transmitter and Receiver**

- Up to 400 ft range (line of sight)
- Convenient key fob design
- 4 buttons to activate up to 4 Wiegand devices
- Secure, Rolling Code + Encryption, digital, anti-playback wireless transmission
- Integrated 125KHz proximity module for close range access credential

**Model** | **DOD**
--- | ---
LRR-4 | 226
LRT-4 | 226

---

**Wiegand Keypad**

- Slender aluminum housing for mullion mounting
- Pigtail leads
- Beeper and LEDs show status
- Standard 26-bit Wiegand interface
- Dimensions: 7.1” x 1.7” x 0.5”
- Designed for outdoor use, the PRX-4 comes standard with Enhanced Weather Protection (EWP), designed to meet IP66 Ingress Protection Rating (see page 6 for EWP info)

**Model** | **DOD**
--- | ---
PRX-4 | 199

---

**Proximity / Entry Controller**

- 1 door with up to 250 users
- Use with a card reader or keypad
- Standard 26-bit Wiegand interface
- Program with a touch tone phone
- Output for data logging
- Power supply included

**Model** | **DOD**
--- | ---
ES-1 | 193

Apartment / Office Entry Controller

The K-1900-3 converts any touch tone phone into a multi-number auto dialer that will store up to 250 telephone numbers. When a call initiated by the K-1900-3 is answered by an apartment or business tenant, a built-in relay contact may be activated to control an electric gate or door strike. Up to 250 keyless entry codes may also be programmed.

- Stores 250 tenant touch tone phone numbers and keyless entry codes
- DPDT relay for controlling door strikes, magnetic locks, gates, etc.

<tbody>
<tr>
<td>K-1900-3</td>
<td>312</td>
</tr>
</tbody>
</table>

No CO Line Entry Controller

Eliminates the monthly expenses of an entry phone line and CO “call waiting” feature on tenant’s lines. The C-3000 rings the tenant’s phone or provides call waiting tones. The tenant can “buzz” the visitor in from their touch tone phone via the front and rear door strike contacts. Power supply included.

- Functions with or without tenant CO lines
- Supports two entry points and 12 tenants
- Expands to 96 tenants by adding more units (each C-3000 adds 12 additional tenants)

4 Door Entry Controller

The C-4000 converts any four touch tone phones into multi-number auto dialers that will store up to 250 telephone numbers. When a call initiated by the C-4000 is answered by an apartment or business tenant, a built-in relay may be activated to control an electric gate or door strike.

- Supports 4 entry points
- Supports 4 Wiegand devices
- Stores 250 tenant touch tone phone numbers and 250 entry codes

Name Directories

Viking’s vandal-resistant directories are an easily installed, high-quality line of displays, designed specifically to complement newly installed or existing secure-building entry systems. All models feature both weather and vandal resistant construction. The D-Series directories are durably constructed from 18 gauge brushed stainless steel to perfectly match the style and function of Viking’s stainless steel phones.

Accessible Entry System

Usable by people with sensory and physical impairments

The Accessible Entry System is a hands-free phone with a built-in auto-dialer, which will allow access to apartment/office buildings by using analog telephone service. In order to assist people of varying abilities, the directory is displayed on the LCD screen and an audible announcement is played.

The system is housed behind a marine grade 316 stainless steel panel with metal keypad and control buttons. Power supply included.

- Supports up to 525 tenant names and phone numbers
- Data logging via the PB-100
- Door strike contacts
- Postal lock input
- Remote recording and programming
- Designed to help meet ADA requirements
- Compatible with Viking proximity credentials (page 38)
- Model AES-2005S and AES-2005F also feature a built-in color video camera
- PB-100 required for programming [see below]

**Model | Description**

| AES-2000S | Surface Mount Entry System |
| AES-2000F | Flush Mount Entry System |
| AES-2005S | Surface Mount Entry System with Camera |
| AES-2005F | Flush Mount Entry System with Camera |
| ERAM-4M | Expansion Memory |

**Applications Include:**

- Apartment/Office Buildings
- Assisted Living Residences
- Nursing Homes
- Gated Communities
- Hospitals
- Public Housing

Add Entry Points to the AES Models

Add up to 32 additional points of entry to the Viking AES-2000 Accessible Entry System. The ES-3 operates a door strike or magnetic lock upon receiving valid credentials from a Wiegand device. One ES-3, one Wiegand device, and a door strike or magnetic lock of your choice is required for each additional entry point.

PC to Phone Line Interface / Controller

The PB-100 connects to a serial or USB port on your PC and also to an analog phone line. The PB-100 accepts ASCII commands to seize the phone line, watch for busy, and to send and receive touch tones or data. If the PC is equipped with a sound card, the audio input and output can be coupled to the phone line. A CD ROM is included with programs to do emergency phone polling, AES-2000 programming, hotel/motel wake up dialer or design your own voice announcer, message center, etc. Power supply included.

- Windows compatible software included
- Remote programming of AES-2000 Entry System (above)

Secure Remote DTMF Controller

- Touch tone programmable
- 6 digit security code
- Relay activation code
- 32 keyless entry codes
- Operates on any 12-24V AC/DC power source
- Power supply included

The SRC-1 enables a standard touch tone phone to securely operate a set of timed 5 Amp relay contacts to control a door strike or gate controller from a remote location. The SRC-1 is fully user programmable and uses non-volatile memory. The SRC-1 eliminates the possibility of dialing the activation code through the entry phone using a hand held touch tone dialer. The SRC-1 can be used with any of Viking’s analog Entry Phones and Doorboxes. A postal lock input is provided.

Remote Controller for 1 Relay

- Programmable access code
- Easy installation
- Selectable relay operation times
- Normally open or normally closed relay

The RC-2A provides remote relay operation from any standard touch tone telephone and can be installed either locally or remotely. For local installations the RC-2A can be installed in parallel on any analog communications path, such as analog CO lines or analog PABX/FXS stations and will passively monitor for touch tone commands.

For off-premise applications, the RC-2A will answer analog CO lines or PABX/FXS stations after a selectable ring delay. Then the RC-2A can be activated to allow remote relay operation. Power supply included.

Remote Controller for 3 Relays

- Operational commands can be customized to 1, 2 or 3 digits in length
- Relay interrogation tones
- Programmable relay times
- Cascade up to three RC-3 units to control up to nine relays

The RC-3 enables a standard touch tone phone to control up to 3 maintained ON, maintained OFF, or momentary relay contacts from a remote location. The RC-3 is fully user programmable and uses non-volatile memory.

Up to three units can be daisy chained on the same line to control up to nine relays. The RC-3 features switchable 32V talk battery allowing easy installation on a trunk/FXO port. The unit can be connected directly to a CO line or analog PABX/FXS station. Power supply included.

Network Enabled Relay Controller

- Notification by email or text message of sensor input state change
- Can be used as a secure remote relay for Viking VoIP phones
- Ready-to-use webpage control interface
- Encrypted login
- Relay names, input names, and input status can be customized on webpage
- Operational commands can be customized to 1, 2 or 3 digits in length
- Relay interrogation tones
- Programmable relay times
- Cascade up to three RC-3 units to control up to nine relays

The RC-4A provides networked control of four relays via an easy-to-use web interface. The same interface can be used to check the status of four contact inputs. Relays can be toggled on or off, or user-programmed timed closures can be activated.

The RC-4A can be configured to work as a remote relay for Viking IP phones, controlling door strikes and gates when a remote relay is required for security reasons. It can also be programmed to send an email or text message in response to a change in one or more of the sensor inputs. Two units can be set up so that activity on a sensor input of one unit will automatically activate one of the relays on the other unit. Power supply included.
Single Entry Phone Interface

Allows House Phones or a Phone System to Share a Phone Line with One Viking Entry Phone

The C-200 allows a single line telephone or a telephone system to share a phone line with a single Viking entry phone. When a visitor presses the call button on the entry phone, the resident’s phone rings. The resident can now answer and converse with the visitor prior to manually allowing entry. If you are on a call, the C-200 provides a “Call Waiting” tone. The resident can “hook flash” which puts the call on hold while they converse with the visitor. Power supply included.

<table>
<thead>
<tr>
<th>Model</th>
<th>DOD</th>
</tr>
</thead>
<tbody>
<tr>
<td>C-200</td>
<td>169</td>
</tr>
</tbody>
</table>

Compatible with: All Viking E-Series and K-Series analog entry phones or use with any standard analog phone.

Single Entry Phone/Relay Controller with Call Forwarding

- 5 Amp door strike or gate control relay
- Immediate call forward mode
- Built in 5 number dialer (1- 20 digits)
- No CO mode

The C-250 allows single line phones or a phone system to share a phone line with a Viking entry phone. When the entry phone initiates a call, the C-250 provides a double ring. If there is no answer, the controller can dial up to 5 numbers to connect the entry phone call to a cell phone or guard station.

Buzz the visitor in with a 1 or 2 digit touch tone command. The C-250 allows tenants to monitor the entry phone and has a postal lock input. Power supply included.

<table>
<thead>
<tr>
<th>Model</th>
<th>DOD</th>
</tr>
</thead>
<tbody>
<tr>
<td>C-250</td>
<td>172</td>
</tr>
</tbody>
</table>

Compatible with: All Viking E-Series and K-Series analog entry phones or use with any standard analog phone.

Two Entry Phone/Relay Controller with Call Forwarding

- No CO mode
- Analog station mode
- Immediate call forward mode
- 6 keyless entry codes per door
- Programmable Caller ID
- Expandable to 4 controllers for up to 8 entry phones

The C-500 allows single line phones or a phone system to share a phone line with two Viking entry phones. When the entry phone initiates a call, the C-500 provides distinctive ring. If there is no answer, the controller can dial up to 5 numbers to connect the entry phone call to a cell phone or guard station. Buzz the visitor in with a 1 or 2 digit touch tone command. The C-500 allows tenants to monitor either phone and features two trigger inputs, 5 Amp door strike or gate opener contacts and programmable entry phone caller ID. Power supply included.

<table>
<thead>
<tr>
<th>Model</th>
<th>DOD</th>
</tr>
</thead>
<tbody>
<tr>
<td>C-500</td>
<td>177</td>
</tr>
</tbody>
</table>

Compatible with: All Viking E-Series and K-Series analog entry phones or use with any standard analog phone.

Four Entry Phone/Relay Controller

- Analog station dial through mode for apartment or office entry applications
- Provides 6 different keyless entry codes per door and 6 master codes for use at any door
- Codes can be set as permanent or “1 time” use
- Provide 4 unique CD quality door chimes plus whole house paging when used with the Viking SLP-4 (page 23)
- Programmable Caller ID
- Programmable relay activation code

Answer and open up to 4 doors or gates from your nearest phone. The C-2000B can provide a double ring and/or caller ID to indicate which entry phone is calling. If you are on a call the controller provides call waiting tones and caller ID. You can place the existing call on hold, talk to the visitor, then return to the original call. The unit can ring up to 16 phones. Programmable “Privacy Number” eliminates prank calls. The C-2000B allows the user to monitor any entry phone with auto answer capability. Power supply included.

<table>

Compatible with: All Viking E-Series and K-Series analog entry phones or use with any standard analog phone.
## Entry Phones

### Features
- Analog or VoIP interface
- Easy one button push operation
- Remotely programmable
- Programmable maximum call length
- Selectable auto-answer feature allows remote monitoring
- Adjustable microphone and speaker volume
- Available with Enhanced Weather Protection (EWP), designed to meet IP66 Ingress Protection Rating
- Optional Surface Mount Boxes available (sold separately), see page 32

### Analog Models
- **E-10A / E-10-IP**
  - Heavy-duty black aluminum faceplate (5.0” x 5.0”)
  - Flush mount
  - Optional Surface Mount Boxes
- **E-20B / E-20-IP**
  - Impact resistant UV stable light gray plastic chassis
  - Dimensions: 5.5” x 4.5”
  - Surface mount only
- **E-30 / E-30-IP**
  - Heavy-duty brushed 316 stainless steel faceplate (5.0” x 5.0”)
  - Flush mount
  - Optional Surface Mount Boxes
- **E-32 / E-32-IP**
  - Heavy-duty brushed 316 stainless steel faceplate (5.0” x 5.0”)
  - Flush mounts in a standard double gang box
- **E-35 / E-35-IP**
  - Built-in analog video camera
  - Heavy-duty brushed 316 stainless steel faceplate (5.0” x 5.0”)
  - Optional Surface Mount Boxes

### VoIP Models
- **E-10A**
  - 2 Amp relay contacts for door or gate control
  - SIP compliant
  - PoE powered (class 1, <4 Watts)
  - Automatic Noise Canceling (ANC) for proper operation in noisy environments
  - Polling and programming software included
  - Network downloadable firmware
  - Program to dial up to 5 numbers on busy or ring no answer
  - Hangs up on busy signal, time-out, or touch tone command
  - Remotely programmable
  - Wide operating temperature range: -40°F to 140°F
- **E-10A-EWP**
- **E-10-IP**
- **E-10-IP-EWP**
- **E-20B**

- **E-35-EWP**
- **E-35-IP**
- **E-35-IP-EWP**
- **E-30-PT**
- **E-30-PT-EWP**

### Single Gang Analog Video Camera
- **VCAM-1**
  - Features tilt and swivel adjustment, stainless steel mounting hardware, potted circuit board, 12VDC adapter / wire connections. For IR illuminator compatibility use model VCAM-1IR.
- **VCAM-2-BN**
  - Fits in a standard single gang box
  - Wide viewing angle
  - Enhanced Weather Protection (EWP)
  - Power supply included
  - Replacement faceplates available

### Compact Analog Color Video Camera Kits
- **VCAM-1**
  - Analog Color Camera
  - IR Analog Color Camera
- **VCAM-2-SS**
  - Stainless Single Gang Panel with Camera
  - Replacement Faceplate for VCAM-2-SS
  - Replacement Faceplate for VCAM-2-BN

## Analog Single Gang Entry Phones

### E-40 Series
- Vandal resistant 18 gauge 304 stainless steel faceplate
- Blue LED helps locate the push button, as well as indicate ringing and off-hook
- Compact size 4.87"H x 3.12"W x 1.7"D
- Flush mounting in a standard single gang box
- Optional VE-3x5 surface mount box (page 33)
- Camera power supply included
- Replacement faceplates available in all finishes, see DOD 188

**E-40-SS** (Brushed Stainless Steel finish)

### E-50 Series
- Built-in color composite video camera with 420 lines of resolution
- Audio and video transmission on one CAT 5e cable
- Compact size 4.87"H x 3.12"W x 1.7"D
- Flush mounting in a standard single gang box
- Optional VE-3x5 surface mount box (page 33)
- Camera power supply included
- Replacement faceplates available in all finishes, see DOD 192

**E-50-BN** (Oil Rubbed Bronze finish)

### Analog Models
- Telephone line powered
- Interface to a CO line, analog PABX station, or FXS port
- Intelligent call progress detection for automatic hang-up on CPC, silence, busy signal, or time-out
- Adjustable mic and speaker volume
- Programmable maximum call length
- Selectable auto-answer feature allows remote monitoring
- Programmable VOX (mic/speaker) switching speed
- Operating temperature: -30°F to 150°F

### VoIP Models
- 2 Amp relay contacts for door or gate control
- SIP compliant
- PoE powered (class 1, <4 Watts)
- Automatic Noise Canceling (ANC) for proper operation in noisy environments
- Network downloadable firmware
- Programmable to dial up to 5 numbers on busy or ring no answer
- Hangs up on busy signal, time-out or touch tone command
- Remotely programmable
- Operating temperature: -40°F to 140°F

## Models on pages 44-45 available in these finishes:

- Brushed Stainless Steel (SS)
- Oil Rubbed Bronze (BN)
- Satin White (WH)
- Textured Black (BK)

## Features
- Analog or VoIP interface
- Convenient handsfree communication
- Easy one button push operation
- Remotely programmable
- Programmable maximum call length
- Selectable auto-answer feature allows remote monitoring
- Adjustable mic and speaker volume
- Enhanced Weather Protection (EWP) models available, designed to meet IP66 Ingress Protection Rating
- Optional Surface Mount Boxes available (see pages 32-33, sold separately)

---

**These aren't your stereotypical entry phones.**

With four great finishes, a Viking Entry Phone will coordinate with any place, at any time.
Analog and VoIP Double Gang Entry Phones

For Features and Operation see page 44

**E-60 / E-60-IP Series**
- VoIP or Analog models available
- Vandal resistant 18 gauge 304 stainless steel faceplate
- Blue LED helps locate the push button, as well as indicate ringing and off-hook
- Dimensions: 4.87” x 4.94” x 1.7”
- Flush mount in a standard double gang box
- Optional Surface Mount Boxes available (page 32, sold separately)
- Replacement faceplates available in all finishes, see DOD 209

E-75-BK (Textured Black finish)
IP Entry Phones with HD Video

- SIP compliant
- PoE powered (class 2, <6.5 Watts)
- Remotely programmable via Web GUI
- ONVIF Profile S compliant
- H.264 and MJPEG video compression
- Integrated 1080p HD video camera with 126° viewing angle
- Dual-Stream HD video allowing for up to two 1080p video streams
- Selectable video resolutions: 352 x 288, 704 x 526, 720p and 1080p
- Multicast paging compatible
- 2 Amp relay contacts for door strikes, gate controllers, strobe lights, etc.
- Cycles through up to five phone numbers on busy or no-answer
- Blue backlit 316 stainless steel push button switch
- X-35 Series: Flush mounts in a standard double gang electrical box (not included), or can be surface mounted using an optional Surface Mount Box (page 32)
- X-35 Series and X-205 Series are available in 3 finishes: Stainless Steel (SS), Textured Black (BK), and Oil Rubbed Bronze (BN)
