

1982: The current Viking building was constructed. Two expansions later, 1531 Industrial Street is still home.

SPOTLIGHT: E-30 Family of Phones

ANALOG INTERFACE

Model E-30

The E-30 handsfree phone is designed to provide quick and reliable handsfree communication and can be connected directly to a C.O. line or analog PABX/KSU station. The E-30 features non-volatile memory, a built in dialer, and intelligent call progress detection for automatic hang-up when the call is completed. The E-30 can be programmed to dial up to 5 different numbers on ring no answer or busy and can be configured to dial these numbers until answered. All of these great features are wrapped up neatly behind a heavy-duty 316 stainless steel faceplate. [See DOD 212 for more info](#)

VOIP INTERFACE

Model E-30-IP

The E-30-IP looks identical to the E-30 but is compatible with SIP VoIP phone systems with PoE. The E-30-IP phone can be programmed from any touch tone phone, PC, or remotely using a static IP address. The phone can dial up to 5 programmable numbers and has built-in 2 Amp relay contacts for activating doorstrikes or gate controllers. All programming parameters, including phone numbers and location numbers, are stored in non-volatile memory, requiring no batteries and the E-30-IP is PoE powered. [See DOD 248 for more info](#)

GET TO KNOW US

Name: Dick Bottorff

How long have you worked with Viking?

Almost 8 years.

What are your responsibilities?

I handle sales outside of the USA and Canada.

Why do you like working with Viking?

I think the best thing about Viking is the people!

Favorite treat to share?

Oh, donuts for sure!

What do you like to do outside of work?

I am a runner, I run like crazy.

Favorite movie or book:

I am reading "Frederick Douglass, Prophet of Freedom" by David Blight

Favorite quote:

"It was the best of times, it was the worst of times."

- Charles Dickens

TECH TIPS

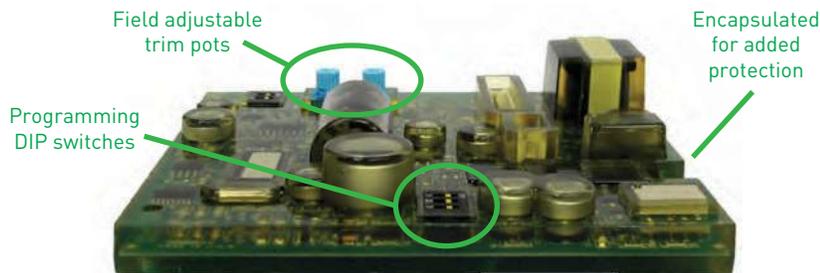

EWP: Enhanced Weather Protection

Give your product extra defense against mother nature!

Some emergency and entry phone applications demand extra protection. Phones that are mounted outdoors, exposed to precipitation, condensation, vehicle exhaust, or corrosive atmosphere like salty air near the ocean, all need an extra measure of weather and corrosion resistance.

Our EWP (Enhanced Weather Protection) phones are designed with total reliability in mind. First, we use internally-sealed push button switches, trim pots and DIP switches so you can adjust microphone and speaker volumes and set programming features right at the installation site.

Then we seal the connections at the push button switch, microphone, and LED using a special non-corrosive sealant. We use a special microphone boot that acts as a shield against water penetration. A mylar speaker is used with foam rubber mounting gasket. Closed cell foam gasketing is used behind front panels to prevent water penetration.

Finally we surround the entire board in a flexible urethane or thermoplastic encapsulating material (shown above), leaving the internally sealed field adjustable trim pots and DIP switches accessible. This special material allows the circuit board and its components to expand and contract, while maintaining weather resistance. To protect the wire connections, we include connectors filled with anti-corrosive sealing gel.

For more info on **Enhanced Weather Protection**, go to VikingElectronics.com and request DOD 859

PRODUCT PROFILES

PUSH-TO-TALK

Model E-30-PT

The E-30-PT features a "Push-To-Talk" button for reliable communication in noisier areas. The mic sensitivity is set to a low level until the "Push-To-Talk" button is pressed, then it is raised to a normal level. This way, the E-30-PT assures that the called party's voice will be broadcast over the speaker.

Model E-30-PT

See DOD 214 for more info

The PUSH-TO-TALK feature is ideal for two-way communication in noisy locations!

TRIVIA QUESTION

Officially released on March 13, 1969, "The Love Bug" movie features a white 1963 Volkswagon Beetle. What name do they give the car?

Everyone who calls, emails, or faxes in the correct answer by June 30, 2019 will be entered into a drawing for a prize.

May Trivia: The first TV episode featuring this mystery solving gang aired on September 13, 1969. What was the name of this animated television series?

Answer: Scooby Doo, Where Are You!

Congratulations to **PAUL SMITH** from **POWER & TEL!**

PRODUCT PROFILES (continued)

DOUBLE GANG MOUNT

Model E-32-IP

The E-32-IP VoIP phone looks and functions like the E-30-IP but is designed to flush mount in a standard double-gang box and provide quick and reliable handsfree communication for SIP VoIP phone systems with PoE. The E-32-IP is also available in analog interface, see model E-32 (DOD 212).

Model **E-32-IP**

See DOD 248 for more info

COLOR VIDEO

Model E-35

The E-35 has all of the same great features as model E-30 in addition to a built-in high resolution analog color video camera - so you can see who is at your door or gate.

The E-35 is also available in VoIP interface, see model E-35-IP (DOD 251).

Model **E-35**

See DOD 178 for more info

EMERGENCY PHONE

Model E-1600-30A

Model E-1600-30A has all of the same features as the E-30 in addition to key features which make this phone ADA compliant. An great solution when you need a compact emergency phone.

The E-1600-30A is also available in VoIP interface: model E-1600-30-IP (DOD 255).

Model **E-1600-30A**

See DOD 215 for more info

COMPATIBLE PRODUCTS

SURFACE MOUNT BOXES

The VE-Series backboxes add vandal and weather resistance, as well as versatility to many Viking products. These backboxes add surface mount capability to select Viking flush mount products. The VE-Series backboxes are available in a variety of colors and styles and are designed to be surface mounted to a wall, post, single or double gang electrical box, or a VE-GNP gooseneck pedestal (right).

For more info on Surface Mount Boxes or Pedestals, see DOD 424

PEDESTALS

The VE-GNP gooseneck pedestals are designed to be used with select Viking surface mount boxes. Ideal for drive up communications, the gooseneck pedestals are constructed of heavy duty black powder painted steel or stainless steel.
