Add Loud Ringing to Any Analog Phone

The SR-1 will generate loud ringing from an analog ringing line or from a dry contact closure. There are 4 different ringing sounds to choose from. Loudness is easily adjusted with a volume control and test button.

The SR-1’s unique sounding rings are useful for employees that often work away from their desks, allowing them to instantly recognize when their phone is ringing. A second set of contact inputs will trigger a door chime (doorbell) sound. This can be used to notify that a door has opened or used as a door bell or push for assistance button.

The SR-1 comes complete with a power supply and connections for an optional external speaker.

Features

- Loud ringing from an analog line
- Loud ringing from a dry contact closure
- Choose one of four ringing sounds:
  - Electronic warble (traditional loud ringer)
  - Double gong (two identical “gong” tones)
  - Quadruple chime (four descending chime tones)
  - Electronic Bell
- Adjustable volume control
- Provides a door chime tone for either a door bell, a door open sensor, or a “Push for Assistance” button
- Test button for setting volume
- External 8 Ohm speaker can be added
- Power supply included

Applications

- Single line loud ringing
- Night bell ringing
- Business/offices/small warehouses
- Floating employee
- “Push Button for Assistance” chime
- Push button doorbell

Specifications

Power: 120V AC/13.8V AC 1.25A, UL listed adapter provided
Dimensions: 5.5" x 4.5" x 1.7" (140mm x 115mm x 43mm)
Shipping Weight: 1.5 lbs (0.75 kg)
Environmental: 32°F to 90°F (0°C to 32°C) with 5% to 95% noncondensing humidity
Maximum Sound Pressure: 90 db @ 1 meter (nominal)
105 db with added 25AE Paging Horn
Connections: 6 cage clamp screw terminals

Information: 715-386-8861
Installation

**IMPORTANT:** Electronic devices are susceptible to lightning and power station electrical surges from both the AC outlet and the telephone line. It is recommended that a surge protector be installed to protect against such surges.

### A. Wiring the SR-1

- **PABX/KSU**
  - Common Audible Contact Closure
- **Ringing Analog PABX/KSU Station**
- **120V AC Power Input**
- **13.8V AC Power Input**

**- or -**

- **Normally Open Door Sensor Switch**
- **Doorbell**
- **"Push for Assistance" Button**
- **Optional 8 Ohm Speaker (model 25AE shown, not included)**

### B. Mounting the SR-1

Mount the back panel to a wall, a single gang box or a 4" x 4" junction box with the arrow pointing up. Attach the cover to the base with the two included screws as shown.

---

**Programming**

The SR-1 contains two different functions: loud ringing and door chime. Use the following sections to program and set-up each function.

### A. Single Line Loud Ringer

#### 1. DIP Switch Programming

<table>

#### 2. Test Button

The **Test Button** is used to test the selected tone and set the volume level.
3. Sound Output Specifications for Loud Ringer

All tones require a minimum of 180ms of ringing voltage (or contact closure) to trigger. Once triggered, the electronic warble and electronic bell will run continuously until ringing stops (or contacts open). All other tones (double gong, quadruple chime, and doorbell) will run through their full sequence once and will not cycle again until the ringing stops (or contact opens) for at least 50ms and a second ring signal (or contact closure) triggers them again.

a. Electronic Warble (traditional loud ringer)

b. Double Gong (two “gong” tones)

c. Quadruple Chime (four descending chime tones)

d. Electronic Bell

B. Door Chime

A second set of contact inputs will trigger a door chime (doorbell) sound. This can be used to notify that a door has opened or used as a door bell or push for assistance button. A momentary contact closure on the door chime screw terminals will produce the door chime (Ding-Dong) tones (right).
The SR-1 will monitor for ringing on an analog phone line such as a PABX/KSU station and will produce the selected loud ringing tone when ring voltage is detected. A dry contact closure can also be used to trigger the selected loud ringing tone. Select the electronic warble tone (traditional loud ringing) for noisy areas. The softer chime and bell tones work well in less noisy environments. The front panel Test Button can be used to easily set the volume level.

A momentary contact closure on the door chime screw terminals will produce the door chime (Ding-Dong) tones. This can be used to notify that a door has been opened, or used as a doorbell, or “Push for Assistance” button.

An external 8 Ohm speaker can be used for greater volume and/or additional coverage.

**Operation**

**RETURNING PRODUCT FOR EXCHANGE**

1. Return shipping address: Be sure to include your return shipping address inside the box. We cannot ship to a PO Box.
2. Freight collect shipments cannot be accepted. Ship cartons prepaid to: Viking Electronics, 1531 Industrial Street, Hudson, WI 54016
3. RA number on carton: In large printing, write the R.A. number on the outside of each carton being returned.

**RETURNING PRODUCT FOR REPAIR**

1. Customer must contact Viking's Technical Support Department at 715-386-8666 to obtain a Return Authorization (RA) number. The customer MUST have a complete description of the problem, with all pertinent information regarding the defect, such as options set, conditions, symptoms, methods to duplicate problem, frequency of failure, etc.
2. Packing: Return equipment in original box or in proper packing so that damage will not occur while in transit. Static sensitive equipment such as a circuit board should be in an anti-static bag, sandwiched between foam and individually boxed. All equipment should be wrapped to avoid packing material lodging in or sticking to the equipment. Include ALL parts of the equipment, C.O.D. or freight collect shipments cannot be accepted. Ship cartons prepaid to: Viking Electronics, 1531 Industrial Street, Hudson, WI 54016
3. Return shipping address: Be sure to include your return shipping address inside the box. We cannot ship to a PO Box.
4. RA number on carton: In large printing, write the R.A. number on the outside of each carton being returned.

**Warranty**

**TWO YEAR LIMITED WARRANTY**

Viking warrants its products to be free from defects in the workmanship or materials, under normal use and service, for a period of two years from the date of purchase from any authorized Viking distributor. If at any time during the warranty period, the product is deemed defective or malfunctions, return the product to Viking Electronics, Inc., 1531 Industrial Street, Hudson, WI 54016. Customer must contact Viking’s Technical Support Department at 715-386-8666 to obtain a Return Authorization (R.A.) number. Viking does not cover any damage to the product due to lightning, over voltage, under voltage, accident, misuse, abuse, negligence or any damage caused by use of the product by the purchaser or others. This warranty does not cover non-EWP products that have been exposed to wet or corrosive environments. This warranty does not cover stainless steel surfaces that have not been properly maintained.

**NO OTHER WARRANTIES**

Viking makes no warranties relating to its products other than as described above and disclaims any express or implied warranties or merchantability or fitness for any particular purpose. Exclusion of consequential damages, Viking shall not, under any circumstances, be liable to purchaser, or any other party, for consequential, incidental, special or exemplary damages arising out of or related to the sale or use of the product sold hereunder.

**EXCLUSIVE REMEDY AND LIMITATION OF LIABILITY**

Whether in an action based on contract, tort (including negligence or strict liability) or any other legal theory, any liability of Viking shall be limited to repair or replacement of the product, or at Viking's option, refund of the purchase price as the exclusive remedy and any liability of Viking shall be so limited.

**PART 15 LIMITATIONS**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
